What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

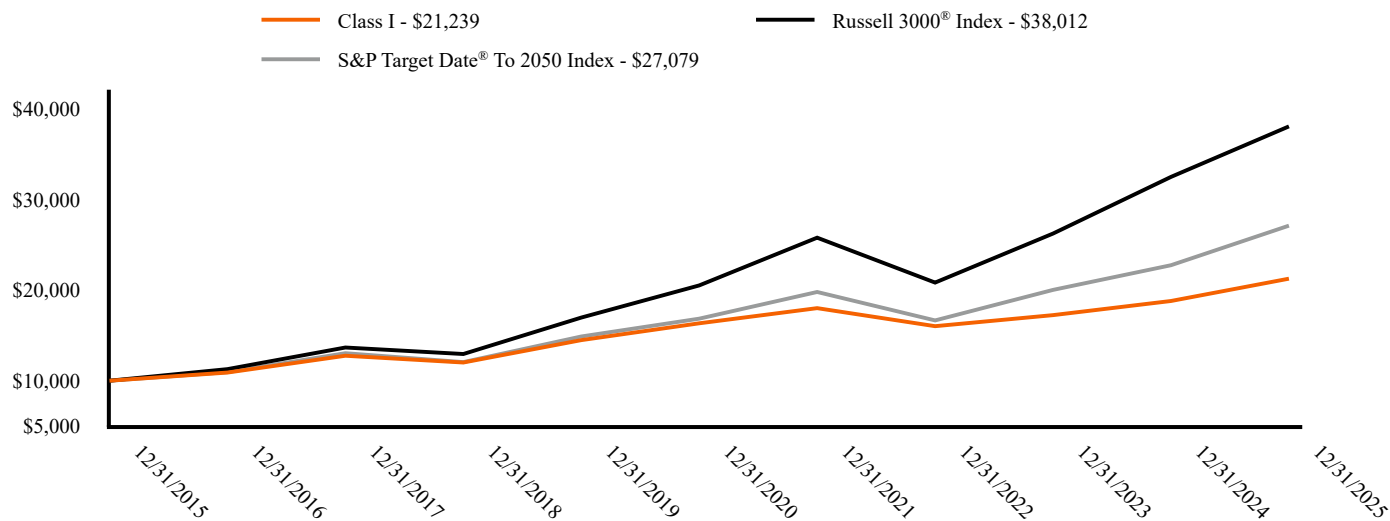

Class Name	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$33	0.31%

How did the Fund perform last year and what affected its performance?

The Fund underperformed its benchmark, primarily due to market performance being driven by a narrow group of large U.S. growth stocks. The Fund's focus on higher-quality investments and more attractively valued segments weighed on relative performance. International equity investments contributed positively to results, including allocations to emerging Asian markets and the Eurozone. However, the Fund's lower overall exposure to U.S. equities detracted from relative performance, as U.S. stocks outperformed non-U.S. markets during the year. Fixed income investments contributed favorably to returns, supported by overweight exposure to securitized assets—particularly mortgage-backed securities—and security selection within corporate credit.

Fund Performance

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)¹

	1 Year	5 Years	10 Years
Class I	13.10%	5.41%	7.82%
Russell 3000 [®] Index ²	17.15%	13.15%	14.29%
S&P Target Date [®] To 2050 Index ³	19.18%	9.97%	10.47%

¹ Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the fund's performance is contained in the prospectus and at www.madisonfunds.com/funds/ultra-series-fund/. **The Fund's past performance is not indicative of future performance.**

² The Russell 3000[®] Index is a broad-based index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents 98% of the investable US equity market.

³ The S&P Target Date[®] To 2050 Index is a benchmark for multi-class asset portfolios that corresponds to the target retirement date 2050.
