4. COST BASIS METHOD ELECTION

Mutual fund companies are required to report cost basis information to shareholders and to the Internal Revenue Service (IRS) on mutual fund shares acquired and subsequently redeemed after January 1, 2012. In order to provide you and the IRS with accurate cost basis accounting you are being asked to select a cost basis method for your new account. You may want to consult your tax professional or financial advisor to determine which method best suits your specific tax situation.

If you do not elect a method, the fund default of AVERAGE COST will be used. The cost basis method you choose will be applied to all investments (i.e. funds you purchase) in this account.

Please choose one of the available methods (select one):

- Average Cost** – averages the purchase price of all covered shares.
- First In, First Out** – shares acquired first are sold first.
- Last In, First Out** – shares acquired last are sold first.
- High Cost, First Out** – shares with the highest purchase price are sold first.
- Low Cost, First Out** – share with the lowest purchase price are sold first.
- Loss/Gain Utilization** – shares are sold by taking losses first (short-term, then long-term) and gains last (long-term, then short-term).
- Specific Lot Identification** – you must specify the shares lots to be sold at the time of redemption.

Selecting Specific Lot Identification requires you choose a Secondary Method from the above list to be used in the event that specific lot depletion information is not provided.
