# Management's Discussion of Fund Performance (unaudited)

*Covered Call strategies, by their nature, are defensive. They are structured to knowingly sacrifice a portion of upside growth potential in order to provide additional downside protection. The Madison Covered Call & Equity Strategy Fund pursues these strategies by owning a very high quality portfolio of individual equities and selling equity call options on the portfolio holdings. The Fund provides a total return platform which seeks capital appreciation and a high distribution rate which is primarily sourced from selling call options and realizing capital gains on the underlying portfolio. It is a relatively concentrated, actively managed portfolio providing a defensive way to participate in U.S. equity markets.*

## Too Much Money Chasing Too Few Goods and Stocks?

Well, that “transitory” inflation that people were talking about a few quarters ago has turned out to be not so transitory and higher prices will likely be with us for much of the coming year. There are a number of factors that have caused the widespread price increases in goods and services. Definitely, a rebounding economy has sharply increased demand following the initial COVID-19 imposed shutdown, but ongoing labor shortages and increased input costs have hampered the production and supply chain which has resulted in bottlenecks and hence, higher prices. Pent up demand explains a big part of the strong overall surge in demand but that has also been largely supported by easy monetary and fiscal policy which has dumped historic amounts of new money into the financial system. Since the beginning of the COVID-19 outbreak in early 2020, over \$6 trillion has been added to the U.S. M2 money supply, which measures cash, checking deposits and easily converted “near money”. That’s over 38% growth in just under 2 years. For reference, the prior 2 decades have averaged just over 6% annual money supply growth. In fact, before 2020, it took 9 years for the money supply to grow the same amount as it did in 2020-2021. All of this cash has got to go somewhere, and it has manifested in higher demand for goods and services and higher demand for stocks. Given concerns about low yields and potentially rising interest rates, the bond market has little to offer investors, so they have been systematically piling into the stock market and other riskier assets like crypto currencies, NFTs, SPACs, meme stocks, private equity, etc. Although earnings in the S&P 500 stocks rebounded nicely in 2021 from a down year in 2020, it is very likely that further strong growth will be challenged by the same rising costs (labor, fuel, commodities, regulation) that we, as consumers, have been dealing with for much of the past 12 months. The Federal Reserve has also recently started removing accommodation from the system and many fear that interest rates will be on the rise for the next few years to combat inflation. Without the surging money supply and strong earnings growth we had in 2021, the liquidity driven bull market may be in for a bumpy 2022.

## How did the Fund perform given the marketplace conditions during 2021?

Over the first 6 months of 2021, the Fund continued to outperform its primary benchmark by a significant margin as it did in 2020. As we became more concerned about future growth prospects and risks in the market, we became increasingly defensive in our posture and as a result, did not participate in the very sharp upward market move in the fourth quarter. Although the Fund’s net asset value (NAV) moved only marginally higher in the fourth quarter, the S&P 500, led by an increasing concentrated number of very large cap technology stocks, rocketed higher by more than 11% and the CBOE S&P 500 Buy-Write Index’s (BXM) rose 7%. Over the full year, the Fund NAV gained 15.36% and on a market price basis, the Fund rose 30.44% compared to the S&P 500’s 28.71% gain and the BXM’s 20.47% gain. While our decision to become more hedged to downside risk was clearly too early, we continue to believe that a higher degree of hedging is warranted given the current heady market environment. Importantly, the Fund’s income distribution for the full year exceeded 9% on both a NAV and market price basis.

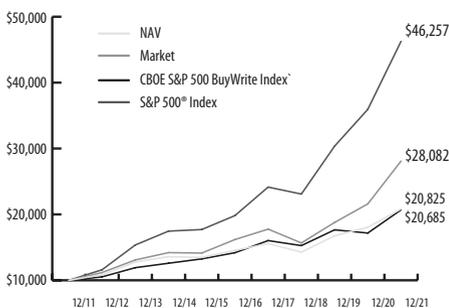

Over the full year, stock selection and sector allocation within the Fund were both very additive to performance despite giving up relative ground in the fourth quarter. The Fund came into the year with a tilt toward cyclical and commodity based companies and less exposure to the higher flying and expensive Technology and Communication Services sectors. This worked very well until the fourth quarter when the overall market seemed driven by a wall of inflows which disproportionately drove up the largest stocks in the index with little regard to fundamentals. In fact, the five largest contributors to the S&P 500 in the fourth quarter represented 39% of the market return. As noted, the Fund became increasingly hedged as the year progressed with higher option coverage and cash levels. These factors were the primary source of the drag on performance late in the year.

Focusing on the fourth quarter, the defensive nature of the Fund's holdings as well as the above-noted cash and call-hedging resulted in a lesser ability to participate in the upward blowout of the market. Sector allocation was only slightly detractive from performance relative to the S&P 500. The most significant negative was our continued underweighting of the Technology sector which we believe is stretched from a valuation perspective. The areas within Technology that we were participating in, namely payment services and processors such as Paypal, Visa and Fiserv, did not benefit as much by the strong market inflows. In addition, the Fund's overweighting in Energy, which has been the strongest positive performance area over the full year, lagged most other sectors in the fourth quarter as concerns over the Omicron variant of the virus began eroding demand expectations.

As noted above, stock selection over the full year has been a strong positive contributor to overall performance, however, during the fourth quarter, it was detractive to performance. With the Energy sector's pause in leadership, individual holdings such as Range Resources and Transocean underperformed although many of the Fund's Energy holdings were among the best performers over the full year. Within the Technology sector, as noted, Paypal and Fiserv were among the weaker performers. Nordstrom, along with other mall based retailers, continued to struggle given the resurgence of virus concerns. Despite an uptick in retail sales, results were somewhat below expectations. On the positive side, CVS performed very well within the HealthCare space as it is becoming recognized as a healthcare powerhouse and not just a retail drug store. Although we had reduced the Fund's exposure to industrial commodities after strong performance early in the year, Alcoa was repurchased and performed well as aluminum and alumina prices continued to trend higher. While certain Energy holdings lagged, Apache and EOG actually held up well and were additive to overall performance.

With such a strong year-end rally, cash holdings and the Fund's call option overlay were detractive to performance, as expected. Given the market strength, there was an increased level of option related assignments which increased the Fund's cash position to the high teens range. As we were growing increasingly concerned about market levels and high valuations, we were very selective in reinvesting the cash. The Fund began the quarter with 84.0% of equity positions covered by call options and ended the quarter with 83.1% coverage. We will remain defensive following such a strong market surge and higher expected volatility in the near term.

**Cumulative Performance of \$10,000 Investment**

**Average Annual Total Return (%) through December 31, 2021\***

	1 Year	5 Years	10 Years*
NAV	15.36%	7.46%	7.61%
Market	30.44%	11.66%	10.88%

CBOE S&P 500 BuyWrite Index	20.47%	7.84%	7.54%

\*The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the sale of fund shares. Past performance is not predictive of future results.

## Describe the Fund's portfolio equity and option structure:

As of December 31, 2021, the Fund held 34 equity securities and unexpired covered call options had been written against 83.1% of the Fund's stock holdings. It is the strategy of the Fund to write "out-of-the-money" call options, and, as of December 31, 2021, 74.0% of the Fund's call options (32 of 43 different options) remained "out-of-the-money". (Out-of-the-money means the stock price is below the strike price at which the shares could be called away by the option holder.) On average, the call options in the Fund were 4.4% out-the-money at year end with an average time to expiration of 40 days.

## Which sectors are prevalent in the Fund?

From a sector perspective, MCN's largest exposure as of December 31, 2021, was to the Information Technology sector, followed by Health Care, Energy, and Industrials. The most significant divergences from the sector weightings of the S&P 500 were over-weightings in the Energy, Materials and Health Care sectors and under-weightings in the Information Technology, Consumer Discretionary and Financial sectors.

### ALLOCATION AS A PERCENTAGE OF TOTAL INVESTMENTS AS OF 12/31/21

Communication Services	7.6%

Health Care	13.6%
Industrials	8.8%
Information Technology	13.9%
Materials	4.6%
Short-Term Investments	20.5%
Utilities	3.2%

## Discuss the Fund's security and option selection process:

The Fund is managed by primarily focusing on active stock selection before adding the call option overlay utilizing individual equity call options rather than index options. We use fundamental analysis to select solid companies with good growth prospects and attractive valuations. We then seek attractive call options to write on those stocks. It is our belief that this partnership of active management of the equity and option strategies provides investors with an innovative, risk-moderated approach to equity investing. The Fund's portfolio managers seek to invest in a portfolio of common stocks that have favorable "PEG" ratios (Price-Earnings ratio to Growth rate) as well as financial strength and industry leadership. As bottom-up investors, we focus on the fundamental businesses of our companies. Our stock selection philosophy strays away from the "beat the street" mentality, as we seek companies that have sustainable competitive advantages, predictable cash flows, solid balance sheets and high-quality management teams. By concentrating on long-term prospects and circumventing the "instant gratification" school of thought, we believe we bring elements of consistency, stability, and predictability to our shareholders.

Once we have selected attractive and solid names for the Fund, we employ our call writing strategy. This procedure entails selling calls that are primarily out-of-the-money, meaning that the strike price is higher than the common stock price, so that the Fund can participate in some stock appreciation. By receiving option premiums, the Fund receives a high level of investment income and adds an element of downside protection. Call options may be written over a number of time periods and at differing strike prices in an effort to maximize the protective value to the strategy and spread income evenly throughout the year.

## Discuss how risk is managed through the Fund's investment process:

Risk management is a critical component of the investment manager's overall philosophy and investment process. The primary means for managing risk are as follows:

1. Focus on the underlying security. The manager's bottom-up stock selection process is geared toward investing in companies with very strong fundamentals including market leadership, balance sheet strength, attractive growth prospects, sustainable competitive advantages, predictable cash flows, and high-quality management teams. Purchasing such companies at attractive valuations is vital to providing an added margin of safety and the manager's "growth-at-a-reasonable-price" (GARP) philosophy is specifically tuned to such valuation discipline.
2. Active covered call writing. The manager actively sells (writes) individual equity call options on equities that are owned by the Fund. The specific characteristics of the call options (strike price, expiration, degree of coverage) are dependent on the manager's outlook on the underlying equity and/or general market conditions. If equity prices appear over-valued due to individual company strength or surging markets, the manager may choose to become more defensive with the Fund's option strategy by selling call options that are closer to the current equity market price, generating larger option premiums which would help defend against a market reversal. The manager may also sell call options on a greater percentage of the portfolio in an effort to provide for more downside protection. Following a market downturn, the manager may sell options further out of the money in order to allow the Fund to benefit from a market recovery. In such an environment, the manager may also determine that a lesser percentage of the portfolio be covered by call options in order to participate in market upside more fully.
3. Cash management and timing. Generally, the manager believes that the Fund should be fully invested under normal market conditions. A covered call strategy is rather unique relative to most equity portfolios as the short term nature of call options can lead to the assignment or sale of underlying stock positions on a fairly regular basis. As a result, the Fund's cash levels are likely to frequently fluctuate based on the characteristics of the call options and the market conditions. The thoughtful reinvestment of cash levels adds a layer of risk management to the investment process. This is most evident following a strong surge in equity prices above the strike prices of call options written against individual stocks in the Fund (call options move in-the-money). This could lead to a larger than normal wave of stock sales via call option assignment which would increase the Fund's cash position following a period of very strong stock. Given the manager's disciplined focus on purchasing underlying securities at appropriate valuation levels, the immediate reinvestment of cash may be delayed until market conditions and valuations become more attractive. If market conditions continue to surge for a period of time, the Fund may underperform due to higher than normal cash levels, however, it is the manager's belief that maintaining a strong valuation discipline will provide greater downside protection over a full market cycle.

## What is the management's outlook for the market and Fund in 2022?

As we have become increasingly defensive in our posture as the market has continued its near parabolic rise, there's always a tendency to question one's stance. Should we capitulate or stand firm? While it was painful to watch our relative performance lag in the second half of 2021, we continue to believe that the larger risk in the market today is to the downside, we just can't pinpoint the timing. The market remains relatively expensive and the primary driver of the post-COVID surge, namely money supply growth, is unlikely to continue at its recent rapid pace. If interest rates do rise this year, P/E multiple contraction is more likely than expansion. That leaves market growth completely reliant on earnings growth. We've noted the margin pressures that should restrain earnings growth this year, but much will depend on the ultimate severity of the Omicron variant and/or future variants and their economic impact or lack thereof. Our concern is that we are continuing to talk about restricting economic and social activity, yet the stock market continues to rise at an accelerating pace. Surely future benefits of a COVID free

environment are priced into existing stock prices. Any deviation or bump along the road will likely result in market turmoil. We believe it prudent to remain conservatively positioned, now more than ever, as we expect to navigate a turbulent 2022.

## INDEX DEFINITIONS

Indices are unmanaged and reflect no expenses. It is not possible to invest directly in an index.

The S&P 500<sup>®</sup> Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The Chicago Board Options Exchange (CBOE) Market Volatility Index, often referred to as the VIX (its ticker symbol), the fear index or the fear gauge, is a measure of the implied volatility of S&P 500 Index options. It represents a measure of the market's expectation of stock market volatility over the next 30-day period. Quoted in percentage points, the VIX represents the expected daily movement in the S&P 500 Index over the next 30-day period, which is then annualized.

The CBOE S&P 500 Buy/Write Index (BXM) is a benchmark index designed to show the hypothetical performance of a portfolio that purchases all the constituents of the S&P 500 Index and then sells at-the-money (meaning same as purchase price) call options of one-month duration against those positions.

Past performance is no guarantee of future results.

The Fund's distribution policy did not have a material impact on its investment strategy during the last fiscal year. To the extent distributions were paid by returning capital, the Fund's per share NAV was reduced by (0.12) in 2021.

Ratios of expenses to average net assets (%)	1.08	1.07	1.07 <sup>3</sup>	1.17 <sup>3</sup>	1.13 <sup>3</sup>
Ratio of net investment income to average net assets (%)	0.16	0.61	1.15	0.75	1.13
Portfolio turnover (%)	178	128	114	114	152

<sup>1</sup> Total net asset value return is calculated based on changes in the net asset value per share for the year reported on. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at the net asset value amount on the date of the distribution.

<sup>2</sup> Total market value return is calculated assuming a purchase of a share of common stock at the market price on the first day and a sale of a share of common stock at the market price on the last day of each year reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the dividend reinvestment plan. Total market value return does not reflect brokerage commissions or sales charges in connection with the purchase or sale of Fund stock.

<sup>3</sup> Includes Board-approved expenses related to special and annual meetings that took place during the year.

# Notes to Financial Statements

## 1. ORGANIZATION

Madison Covered Call & Equity Strategy Fund (the “Fund”) was organized as a Delaware statutory trust on May 6, 2004. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940 (“1940 Act”), as amended, and the Securities Act of 1933, as amended.

The Fund’s primary investment objective is to provide a high level of current income and current gains, with a secondary objective of long-term capital appreciation. The Fund will pursue its investment objectives by investing primarily in large and mid-capitalization common stocks that are, in the view of Madison Asset Management, LLC, the Fund’s investment adviser (the “Adviser”), selling at a reasonable price in relation to their long-term earnings growth rates. Under normal market conditions, the Fund will seek to generate current earnings from option premiums by writing (selling) covered call options on a substantial portion of its portfolio securities. There can be no assurance that the Fund will achieve its investment objectives. The Fund’s investment objectives are considered fundamental and may not be changed without shareholder approval.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The Fund is an investment company that applies the accounting and reporting guidance in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, Financial Services - Investment Companies (ASC 946). The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements.

**Use of Estimates:** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. Such estimates affect the reported amounts of assets and liabilities and reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

**Portfolio Valuation:** Securities traded on a national securities exchange are valued at their closing sale price, except for securities traded on the National Association of Securities Dealers Automated Quotation System (“NASDAQ”), which are valued at the NASDAQ official closing price (“NOCP”). If no sale occurs, equities traded on a U.S. exchange or on NASDAQ are valued at the bid price. Options are valued at the mean between the best bid and best ask price across all option exchanges. Debt securities having maturities of 60 days or less are valued at amortized cost, which approximates market value. Debt securities having longer maturities are valued on the basis of the last available bid prices or current market quotations provided by dealers or pricing services approved by the Fund. Mutual funds are valued at their net asset value (“NAV”). Securities for which market quotations are not readily available are valued at their fair value as determined in good faith under procedures approved by the Board of Trustees.

At times, the Fund maintains cash balances at financial institutions in excess of federally insured limits. The Fund monitors this credit risk and has not experienced any losses related to this risk.

**Investment Transactions and Investment Income:** Investment transactions are recorded on a trade date basis. The cost of investments sold is determined on the identified cost basis for financial statement and federal income tax purposes. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis.

**Covered Call and Put Options:** An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or “strike” price. The writer of an option on a security has an

obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or pay the exercise price upon delivery of the underlying security (in the case of a put).

The number of call options the Fund can write (sell) is limited by the amount of equity securities the Fund holds in its portfolio. The Fund will not write (sell) "naked" or uncovered call options. The Fund seeks to produce a high level of current income and gains generated from option writing premiums and, to a lesser extent, from dividends.

Options on securities indices are designed to reflect price fluctuations in a group of securities or segment of the securities market rather than price fluctuations in a single security and are similar to options on single securities, except that the exercise of securities index options requires cash settlement payments and does not involve the actual purchase or sale of securities.

When an option is written, a liability is recorded equal to the premium received. This liability for options written is marked-to-market on a daily basis to reflect the current market value of the option written. These liabilities are reflected as options written in the Statement of Assets and Liabilities. Premiums received from writing options that expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss.

**Distributions to Shareholders:** The Fund declares and pays quarterly distributions to shareholders. Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from Generally Accepted Accounting Principles ("GAAP"). These distributions consist of investment company taxable income, which generally includes qualified dividend income, ordinary income and short-term capital gains, including premiums received on written options. Distributions may also include a return of capital. Any net realized long-term capital gains are distributed annually to shareholders. The character of the distributions are determined annually in accordance with federal income tax regulations.

**Recently Issued Accounting Pronouncements:** In March 2020, the FASB issued Accounting Standards Update ("ASU") 2020-04, which provides optional expedients and exceptions for contracts, hedging relationships and other transactions affected by reference rate reform if certain criteria are met. The adoption of the ASU is elective. At this time, management is evaluating the implications of these changes on the financial statements.

### 3. FAIR VALUE MEASUREMENTS

The Fund has adopted FASB applicable guidance on fair value measurements. Fair value is defined as the price that each fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. A three-tier hierarchy is used to maximize the use of observable market data "inputs" and minimize the use of unobservable "inputs" and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk (for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique). Inputs may be observable or unobservable.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market

participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below:

- Level 1 - unadjusted quoted prices in active markets for identical investments
- Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rate volatilities, prepayment speeds, credit risk, benchmark yields, transactions, bids, offers, new issues, spreads and other relationships observed in the markets among comparable securities, underlying equity of the issuer; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The valuation techniques used by the Fund to measure fair value for the year ended December 31, 2021, maximized the use of observable inputs and minimized the use of unobservable inputs.

There were no transfers between classifications levels during the year ended December 31, 2021. As of and during the year ended December 31, 2021, the Fund did not hold securities deemed as a Level 3.

The following is a summary of the inputs used as of December 31, 2021, in valuing the Fund's investments carried at fair value:

Description	Level 1	Level 2	Level 3	Value at 12/31/21
<b>Assets:<sup>1</sup></b>				
Common Stocks	\$ 123,085,576	\$ —	\$ —	\$ 123,085,576

Options Written	\$ (3,140,172)	\$ —	\$ —	\$ (3,140,172)

<sup>1</sup> Please see the Portfolio of Investments for a listing of all securities within each category.

#### 4. ADVISORY, ADMINISTRATIVE SERVICES AND OTHER EXPENSES

Pursuant to an Investment Advisory Agreement with the Fund, the Adviser, under the supervision of the Fund's Board of Trustees, provides a continuous investment program for the Fund's portfolio; provides investment research and makes and executes recommendations for the purchase and sale of securities; and provides certain facilities and personnel, including officers required for the Fund's administrative management and compensation of all officers and interested trustees of the Fund. For these services, the Fund pays the Adviser an advisory fee, payable monthly, in an amount equal to an annualized rate of 0.80% of the Fund's average daily net assets.

Under a separate Administrative Services Agreement, the Adviser also provides or arranges to have a third party provide the Fund with such services as it may require in the ordinary course of its business. Services to the Fund include: compliance services, custodial services, fund administration services, fund accounting services, and such other services necessary to conduct the Fund's business. In addition, the Adviser shall arrange and pay for independent public accounting services for audit and tax purposes, legal services, a fidelity bond, and directors and officers/errors and omissions insurance. In exchange for these services, the Fund pays the Adviser a service fee, payable monthly, equal to an annualized rate of 0.26% of the Fund's average daily net assets. Not included in this fee and, therefore, the responsibility of the Fund are "excluded expenses" and "transitional expenses." Excluded

expenses consist of (i) any fees and expenses relating to portfolio holdings (e.g., brokerage commissions, interest on loans, etc.); (ii) extraordinary and non-recurring fees and expenses (e.g., costs relating to any borrowing costs, overdrafts or taxes the Fund may owe, etc.); (iii) the costs associated with investment by the Fund in other investment companies (i.e., acquired fund fees and expenses); and (iv) Independent Trustees compensation, including Lead Independent Trustee compensation.

Certain officers and Trustees of the Fund may also be officers, directors and/or employees of the Adviser or its affiliates. The Fund does not compensate its officers or Trustees who are officers, directors and/or employees of the Adviser or its affiliates.

## 5. SECURITIES LENDING:

The Board of Trustees has authorized the Fund to engage in securities lending with State Street Bank and Trust Company as securities lending agent pursuant to a Securities Lending Authorization Agreement (the "Agreement") and subject to the Fund's securities lending policies and procedures. Under the terms of the Agreement, and subject to the policies and procedures, the Fund may lend portfolio securities to qualified borrowers in order to generate additional income, while managing risk associated with the securities lending program. The Agreement requires that loans are collateralized at all times by cash or U.S. government securities, initially equal to at least 102% of the value of the domestic securities and 105% of non-domestic securities, based upon the prior days market value for securities loaned. The loaned securities and collateral are marked to market daily to maintain collateral at 102% of the total loaned portfolio. Amounts earned as interest on investments of cash collateral, net of rebates and fees, if any, are included in the Statement of Operations. The primary risk associated with securities lending is loss associated with investment of cash and non-cash collateral. A secondary risk is if the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons. The Fund could experience delays and costs in recovering securities loaned or in gaining access to the collateral. Under the Agreement, the securities lending agent has provided a limited indemnification in the event of a borrower default. The Fund does not have a master netting agreement.

Cash collateral received for securities on loan are reinvested into the State Street Navigator Securities Lending Government Money Market Portfolio. Non-cash collateral is invested in U.S. treasuries or government securities. As of December 31, 2021, the Fund did not have any securities on loan to brokers/dealers.

## 6. DERIVATIVES

The FASB issued guidance intended to enhance financial statement disclosure for derivative instruments and enable investors to understand: a) how and why a fund uses derivative investments, b) how derivative instruments are accounted for, and c) how derivative instruments affect a fund's financial position, and results of operations.

The following table presents the types of derivatives in the fund by location and as presented on the Statement of Assets and Liabilities as of December 31, 2021.

Underlying Risk	Statement of Asset & Liability Presentation of Fair Values of Derivative Instruments			
	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Equity	Options purchased	\$ 273,750	Options written	\$( 3,140,172)

The following table presents the effect of derivative instruments on the Statement of Operations for the period ended December 31, 2021.

Statement of Operations	Underlying Risk	Realized Gain (Loss) on Derivatives	Change in Unrealized Appreciation (Depreciation) on Derivatives
Options Purchased	Equity	\$ (1,484,969)	\$ (1,863,005)
Options Written	Equity	3,621,980	1,630,320
		<u>\$ 2,137,011</u>	<u>\$ (232,685)</u>

The average volume (based on the open positions at each month-end) of derivative activity during the period ended December 31, 2021 was as follows:

	Options Purchased Contracts <sup>(1)</sup>	Options Written Contracts <sup>(1)</sup>
Madison Covered Call & Equity Strategy Fund	63	12,182

<sup>(1)</sup>Number of Contracts

## 7. FEDERAL INCOME TAX INFORMATION

No provision is made for federal income taxes since it is the intention of the Fund to comply with the provisions of Subchapter M of the Internal Revenue Code of 1986 as amended, applicable to regulated investment companies and to make the requisite distribution to shareholders of taxable income, which will be sufficient to relieve it from all or substantially all federal income taxes.

Due to inherent differences in the recognition of income, expenses, and realized gains/losses under GAAP and federal income tax purposes, permanent differences between book and tax basis reporting have been identified and appropriately reclassified on the Statement of Assets and Liabilities. At December 31, 2021, distributable earnings of \$2,532,497 were increased and paid in capital was decreased by the same amount to reflect the return-of-capital distribution in 2021.

At December 31, 2021, the aggregate gross unrealized appreciation (depreciation) and net unrealized for all securities, as computed on a federal income tax basis for the fund were as follows:

Cost	\$ 177,278,496
Gross appreciation	5,774,722
Gross depreciation	(22,848,884)
Net depreciation	<u>\$ (17,074,162)</u>

Net realized gains or losses may differ for financial reporting and tax purposes primarily as a result of the deferral of losses relating to wash sale transactions and certain market-to-market investments.

For the years ended December 31, 2021, and 2020, the tax character of distributions paid to shareholders was \$12,559,719 ordinary income, and \$2,532,497 for return on capital for 2021 and \$8,698,635 ordinary income, \$1,697,061 for long-term gain and \$4,686,089 for return on capital for 2020.

As of December 31, 2021, the Fund had no distributable earnings on a tax basis.

For all open tax years and all major jurisdictions, management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Uncertain tax positions are tax positions taken or expected to be taken in the course of preparing the Fund's tax returns that would not meet a more-likely-than-not threshold of being sustained by the applicable tax authority and would be recorded as a tax expense in the current year. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends). Furthermore, management of the Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will

significantly change in the next twelve months. It is the Fund's policy to recognize accrued interest and penalties related to uncertain tax benefits in income taxes, as appropriate.

## 8. INVESTMENT TRANSACTIONS

During the year ended December 31, 2021, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$200,584,790 and \$216,749,910 respectively. No long-term U.S. government securities were purchased or sold during the year.

## 9. CAPITAL

The Fund has an unlimited amount of common shares, \$0.01 par value, authorized and 20,981,550 shares issued and outstanding as of December 31, 2021. During the year ended December 31, 2021, 34,626 shares were issued and reinvested, per the Dividend Reinvestment Plan, since the Fund was trading at a premium. There were no shares issued and reinvested for the year ended December 2020.

## 10. INDEMNIFICATIONS

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent upon claims that may be made against the Fund in the future and therefore cannot be estimated; however, the Fund considers the risk of material loss from such claims as remote.

## 11. DISCUSSION OF RISKS

**Equity Risk:** The value of the securities held by the Fund may decline due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

**Option Risk:** There are several risks associated with transactions in options on securities. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events.

As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but retains the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

When the Fund writes covered put options, it bears the risk of loss if the value of the underlying stock declines below the exercise price. If the option is exercised, the Fund could incur a loss if it is required to purchase the stock underlying the put option at a price greater than the market price of the stock at the time of exercise. While the Fund's potential gain in writing a covered put option is limited to the interest earned on the liquid assets securing the put option plus the premium received from the purchaser of the put option, the Fund risks a loss equal to the entire value of the stock.

**Derivatives Risk:** The risk that loss may result from investments in options, forwards, futures, swaps and other derivatives instruments. These instruments may be illiquid, difficult to price and leveraged so that small changes

in the value of the underlying instruments may produce disproportionate losses to the fund. Derivatives are also subject to counterparty risk, which is the risk that the other party to the transaction will not fulfill its contractual obligations.

**Industry Concentration Risk:** To the extent that the Fund makes substantial investments in a single industry, the Fund will be more susceptible to adverse economic or regulatory occurrences affecting those sectors.

**Fund Distribution Risk:** In order to make regular quarterly distributions on its common shares, the Fund may have to sell a portion of its investment portfolio at a time when independent investment judgment may not dictate such action. In addition, the Fund's ability to make distributions more frequently than annually from any net realized capital gains by the Fund is subject to the Fund obtaining exemptive relief from the SEC, which cannot be assured. To the extent the total quarterly distributions for a year exceed the Fund's net investment company income and net realized capital gain for that year, the excess will generally constitute a return of the Fund's capital to its common shareholders. Such return of capital distributions generally are tax-free up to the amount of a common shareholder's tax basis in the common shares (generally, the amount paid for the common shares). In addition, such excess distributions will decrease the Fund's total assets and may increase the Fund's expense ratio.

**Cybersecurity Risk:** The Fund is also subject to cybersecurity risk, which includes the risks associated with computer systems, networks and devices to carry out routine business operations. These systems, networks and devices employ a variety of protections that are designed to prevent cyberattacks. Despite the various cyber protections utilized by the Fund, the Adviser, and other service providers, their systems, networks, or devices could potentially be breached. The Fund, its shareholders, and the Adviser could be negatively impacted as a result of a cybersecurity breach. The Fund cannot control the cybersecurity plans and systems put in place by service providers or any other third parties whose operations may affect the Fund.

**Foreign Investment Risk:** Investing in non-U.S. issuers may involve unique risks such as currency, political, and economic risks, as well as lower market liquidity, generally greater market volatility and less complete financial information than for U.S. issuers.

**Mid-Cap Company Risk:** Mid-Cap companies often are newer or less established companies than larger companies. Investments in mid-cap companies carry additional risks because earnings of these companies tend to be less predictable; they often have limited product lines, markets, distribution channels or financial resources; and the management of such companies may be dependent upon one or a few key people. The market movements of equity securities of mid-cap companies may be more abrupt or erratic than the market movements of equity securities of larger, more established companies or the stock market in general.

**Financial Leverage Risk:** The Fund is authorized to utilize leverage through the issuance of preferred shares and/or the Fund may borrow or issue debt securities for financial leveraging purposes and for temporary purposes such as settlement of transactions. Although the use of any financial leverage by the Fund may create an opportunity for increased net income, gains and capital appreciation for common shares, it also results in additional risks and can magnify the effect of any losses. If the income and gains earned on securities purchased with financial leverage proceeds are greater than the cost of financial leverage, the Fund's return will be greater than if financial leverage had not been used. Conversely, if the income or gain from the securities purchased with such proceeds does not cover the cost of financial leverage, the return to the Fund will be less than if financial leverage had not been used. Financial leverage also increases the likelihood of greater volatility of the NAV and market price of, and dividends on, the common shares than a comparable portfolio without leverage.

**Additional Risks:** While investments in securities have been keystones in wealth building and management, at times these investments have produced surprises. Those who enjoyed growth and income of their investments

generally were rewarded for the risks they took by investing in the markets. Although the Adviser seeks to appropriately address and manage the risks identified and disclosed to you in connection with the management of the securities in the Fund, you should understand that the very nature of the securities markets includes the possibility that there may be additional risks of which we are not aware. We certainly seek to identify all applicable risks and then appropriately address them, take appropriate action to reasonably manage them and to make you aware of them so you can determine if they exceed your risk tolerance. Nevertheless, the often volatile nature of the securities markets and the global economy in which we work suggests that the risk of the unknown is something to consider in connection with an investment in securities. Unforeseen events could under certain circumstances produce a material loss of the value of some or all of the securities we manage for you in the Fund.

## **12. IMPACTS OF COVID-19**

The global outbreak of COVID-19 has disrupted financial markets and the prolonged economic impact is uncertain. The performance of the funds' investments depends on future developments, including the duration and spread of the outbreak and the creation, distribution and efficacy of a vaccine. While U.S. and global economies are recovering from the effects of COVID-19, the recovery is proceeding slower than expected and may last for a prolonged period of time. Events related to COVID-19 may result in further global economic disruption and market volatility which in turn may impact the value of the fund's investments.

## **13. SUBSEQUENT EVENTS**

Management has evaluated all subsequent events through the date the financial statements were issued. No events have taken place that meet the definition of a subsequent event that requires adjustment to, or disclosure in, the financial statements.

# Audit Opinion

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Trustees of Madison Covered Call & Equity Strategy Fund:

### **Opinion on the Financial Statements and Financial Highlights**

We have audited the accompanying statement of assets and liabilities of Madison Covered Call & Equity Strategy Fund (the “Fund”), including the portfolio of investments as of December 31, 2021, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended, and the related notes. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Fund as of December 31, 2021, and the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

### **Basis for Opinion**

These financial statements and financial highlights are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements and financial highlights based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. Our procedures included confirmation of securities owned as of December 31, 2021, by correspondence with the custodian and brokers. We believe that our audit provides a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP

Chicago, Illinois  
February 22, 2022

We have served as the auditor of one or more Madison Investment Advisors investment companies since 2009.

# Fund Investment Objectives, Policies and Risks (unaudited)

## Recent Changes

During the most recent fiscal year ended, there were no material changes in (i) the Fund's investment objectives or policies that have not been approved by shareholders or (ii) in the principal risks factors associated with investment in the Fund. Furthermore there were no change in the persons primarily responsible for the day-to-day management of the Fund's portfolio.

## Investment Objective:

To provide a high level of current income and current gains, with a secondary objective of long-term capital appreciation.

## Principal Investment Strategy:

The Fund invests at least 80% of its total assets in common stocks, with at least 65% of its total assets in common stocks of large capitalization issuers. The Fund may invest the remainder of its total assets in companies that meet the Fund's growth and value criteria but whose market capitalization is considered as middle sized or "mid-cap."

The Fund will pursue its primary objective by employing an option strategy of writing (selling) a substantial amount (i.e., 80%) of covered call options on common stocks.

In addition to its covered call strategy the Fund may, to a lesser extent (not more than 20% of its total assets), pursue an option strategy that includes the sale (writing) of both put options and call options on certain of the common stocks in the Fund's portfolio. To seek to offset some of the risk of a larger potential decline in the event the overall stock market has a sizeable short-term or intermediate-term decline, the Fund may purchase put options on certain ETFs (exchange-traded funds) that trade like common stocks but represent certain market indices such as the Nasdaq 100 or S&P 500 that correlate with the mix of common stocks held in the Fund's portfolio.

## Fundamental Policies:

The following are fundamental policies and may not be changed without the approval of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund.

**Senior Securities and Borrowing.** The Fund may not issue senior securities nor borrow money, except the Fund may issue senior securities or borrow money to the extent permitted by applicable law.

**Acting as Underwriter:** The Fund may not act as an underwriter of securities of other issuers, except to the extent that the Fund might be considered an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act") in the disposition of securities.

**Industry Concentration:** The Fund may not invest in any security if, as a result, 25% or more of the value of the Fund's total assets, taken at market value at the time of each investment, are in the securities of issuers in any particular industry or group of related industries (as such terms are defined by the Fund's Board of Trustees) except (a) excluding securities issued or guaranteed by the U.S. government and its agencies and instrumentalities or tax-exempt securities of state and municipal governments or their political subdivisions, (b) when the Fund has taken a temporary defensive position, or (c) as otherwise permitted by applicable law.

**Real Estate:** The Fund may not purchase or sell real estate, except that the Fund may (a) acquire or lease office space for its own use, (b) invest in securities of issuers that invest in real estate or interests therein or that are engaged in or operate in the real estate industry, (c) invest in securities that are secured by real estate or interests therein, (d) purchase and sell mortgage-related securities, (e) hold and sell real estate acquired by the Fund as a result of the ownership of securities and (f) as otherwise permitted by applicable law.

**Commodities:** The Fund may not purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments; provided that this restriction shall not prohibit the Fund from purchasing or selling options, futures contracts and related options thereon, forward contracts, swaps, caps, floors, collars and any other financial instruments or from investing in securities or other instruments backed by physical commodities or as otherwise permitted by applicable law.

**Lending:** The Fund may not make loans of money or property to any person, except (a) to the extent that securities or interests in which the Fund may invest are considered to be loans, (b) through the loan of portfolio securities in an amount up to 33% of the Fund's total assets, (c) by engaging in repurchase agreements or as may otherwise be permitted by applicable law.

**Diversification:** The Fund is classified as a "diversified" investment company under the 1940 Act, which means it will limit the proportion of its total assets that may be invested in the securities of a single issuer. The Fund will not purchase more than 10% of the outstanding voting securities of any one issuer, or, with respect to 75% of its total assets, invest in securities of any one issuer if immediately after and as a result of such investment more than 5% of the total assets of the Fund would be invested in securities of such issuer.

## **Non-Fundamental Policies:**

The following are non-fundamental policies and may be changed without the approval of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund.

**Sector Concentration:** No stated sector limitation. However, MCN does not invest or intend to invest in more than 35% of its net assets in the securities of any single sector.

**Single Security:** The Fund may invest no more than 4% of total assets in any single security.

**Mid Cap:** No stated limitation, however, MCN does not intend to invest more than 35% of its net assets in mid-cap companies.

**Short Sales:** The Fund may not invest more than 25% of its total assets in short sales, more than 10% of its total assets in short sales of any one issuer or more than 5% of any single issuer's voting shares in short sales.

## **Risks of the Fund:**

The Fund is a closed-end management investment companies designed primarily as long-term investments and not as a trading vehicle. The Fund is not intended to be a complete investment program and, due to the uncertainty inherent in all investments, there can be no assurance that the Fund will achieve its investment objectives. The following are the principal risks of investing in the Fund.

**Investment Risk.** An investment in the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest.

**Equity Risk.** Substantially all of the Fund's assets will be invested in common stocks and (to a lesser extent) preferred equity securities, and therefore a principal risk of investing in the Fund is equity risk. Equity risk is the

risk that securities held by the Fund will fall due to general market or economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, and the particular circumstances and performance of particular companies whose securities the Fund holds. For example, an adverse event, such as an unfavorable earnings report, may depress the value of equity securities of an issuer held by the Fund; the price of common stock of an issuer may be particularly sensitive to general movements in the stock market; or a drop the stock market may depress the price of most or all of the common stocks and other equity securities held by the Fund. In addition, common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer of the security experiences a decline in its financial condition. Common equity securities in which the Fund will invest are structurally subordinated to preferred stocks, bonds and other debt instruments in a company's capital structure, in terms of priority to corporate income, and therefore will be subject to greater dividend risk than preferred stocks or debt instruments of such issuers. In addition, while broad market measures of common stocks have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns.

**Options on Securities Risk.** There are several risks associated with transactions in options on securities. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation (the "OCC") may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options). If trading were discontinued, the secondary market on that exchange (or in that class or series of options) would cease to exist. However, outstanding options on that exchange that had been issued by the OCC as a result of trades on that exchange would continue to be exercisable in accordance with their terms. The Fund's ability to terminate over-the-counter options is more limited than with exchange-traded options and may involve the risk that broker-dealers participating in such transactions will not fulfill their obligations. If the Fund were unable to close out a covered call option that it had written on a security, it would not be able to sell the underlying security unless the option expired without exercise.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. Call options are marked to market daily and their value will be affected by changes in the value of and dividend rates

of the underlying common stocks, an increase in interest rates, changes in the actual or perceived volatility of the stock market and the underlying common stocks and the remaining time to the options' expiration. Additionally, the exercise price of an option may be adjusted downward before the option's expiration as a result of the occurrence of certain corporate events affecting the underlying equity security, such as extraordinary dividends, stock splits, merger or other extraordinary distributions or events. A reduction in the exercise price of an option would reduce the Fund's capital appreciation potential on the underlying security.

When the Fund writes covered put options, it bears the risk of loss if the value of the underlying stock declines below the exercise price. If the option is exercised, the Fund could incur a loss if it is required to purchase the stock underlying the put option at a price greater than the market price of the stock at the time of exercise. While the Fund's potential gain in writing a covered put option is limited to the interest earned on the liquid assets securing the put option plus the premium received from the purchaser of the put option, the Fund risks a loss equal to the entire value of the stock.

To the extent that the Fund purchases options pursuant to a hedging strategy, the Fund will be subject to the following additional risks. If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price (in the case of a put), or remains less than or equal to the exercise price (in the case of a call), the Fund will lose its entire investment in the option. Also, where a put or call option on a particular security is purchased to hedge against price movements in a related security, the price of the put or call option may move more or less than the price of the related security. If restrictions on exercise were imposed, the Fund might be unable to exercise an option it had purchased. If the Fund were unable to close out an option that it had purchased on a security, it would have to exercise the option in order to realize any profit or the option may expire worthless.

**Limitation of Option Writing Risk.** The number of call options the Fund can write is limited by the number of shares of common stock the Fund holds, and further limited by the fact that call options represent 100 share lots of the underlying common stock. The Fund will not write "naked" or uncovered call options. Furthermore, the Fund's options transactions will be subject to limitations established by each of the exchanges, boards of trade or other trading facilities on which such options are traded. These limitations govern the maximum number of options in each class which may be written or purchased by a single investor or group of investors acting in concert, regardless of whether the options are written or purchased on the same or different exchanges, boards of trade or other trading facilities or are held or written in one or more accounts or through one or more brokers. Thus, the number of options which the Fund may write or purchase may be affected by options written or purchased by other investment advisory clients of the Adviser. An exchange, board of trade or other trading facility may order the liquidation of positions found to be in excess of these limits, and it may impose certain other sanctions.

**Mid-Cap Companies Risk.** Mid-cap companies often are newer or less established companies than larger companies. Investments in mid-cap companies carry additional risks because earnings of these companies tend to be less predictable; they often have limited product lines, markets, distribution channels or financial resources; and the management of such companies may be dependent upon one or a few key people. The market movements of equity securities of mid-cap companies may be more abrupt or erratic than the market movements of equity securities of larger, more established companies or the stock market in general. Historically, mid-cap companies have sometimes gone through extended periods when they did not perform as well as larger companies. In addition, equity securities of mid-cap companies generally are less liquid than those of larger companies. This means that the Fund could have greater difficulty selling such securities at the time and price that the Fund would like.

**Income Risk.** The income common shareholders receive from the Fund is based primarily on the premiums the Fund receives from writing options as well as the dividends and interest it earns from its investments, which can vary widely over the short- and long- term. If prevailing market interest rates drop, distribution rates of the Fund's portfolio holdings of preferred securities and debt securities may decline which then may adversely affect the Fund's distributions on common shares as well. The Fund's income also would likely be affected adversely when prevailing short-term interest rates increase at any time during which the Fund is utilizing financial leverage.

**Foreign Securities Risk.** Investments in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers. These risks are more pronounced to the extent that the Fund invests a significant portion of its non-U.S. investments in one region or in the securities of emerging market issuers. These risks may include: less information about non-U.S. issuers or markets may be available due to less rigorous disclosure or accounting standards or regulatory practices; many non-U.S. markets are smaller, less liquid and more volatile; in a changing market, the Adviser may not be able to sell the Fund's portfolio securities at times, in amounts and at prices it considers desirable; the economies of non-U.S. countries may grow at slower rates than expected or may experience downturns or recessions; economic, political and social developments may adversely affect the securities markets; and withholding and other non-U.S. taxes may decrease the Fund's return.

**Derivatives Risk.** In addition to the risks associated with its option strategies, the Fund may, but is not required or expected to any significant extent, participate in certain derivative transactions. Such transactions entail certain execution, market, liquidity, hedging and tax risks. Participation in the options or futures markets involves investment risks and transaction costs to which the Fund would not be subject absent the use of these strategies. If the Adviser's prediction of movements in the direction of the securities and interest rate markets is inaccurate, the consequences to the Fund may leave the Fund in a worse position than if it had not used such strategies.

**Illiquid Securities Risk.** Although the Fund does not anticipate doing so to any significant extent, the Fund may invest in securities for which there is no readily available trading market or are otherwise illiquid. It may be difficult to sell such securities at a price representing the fair value and where registration is required, a considerable period may elapse between a decision to sell the securities and the time when the Fund would be permitted to sell.

**Fund Distribution Risk.** Pursuant to its distribution policy, the Fund intends to make regular quarterly distributions on its common shares. In order to make such distributions, the Fund may have to sell a portion of its investment portfolio at a time when independent investment judgment may not dictate such action. In addition, the Fund's ability to make distributions more frequently than annually from any net realized capital gains by the Fund is subject to the Fund obtaining exemptive relief from the SEC, which cannot be assured. To the extent the total quarterly distributions for a year exceed the Fund's net investment company income and net realized capital gain for that year, the excess will generally constitute a return of capital. Such return of capital distributions generally are tax- free up to the amount of a common shareholder's tax basis in the common shares (generally, the amount paid for the common shares). In addition, such excess distributions will decrease the Fund's total assets and may increase the Fund's expense ratio.

**Market Discount Risk.** Whether investors will realize gains or losses upon the sale of shares of the Fund will depend upon the market price of the shares at the time of sale, which may be less or more than the Fund's net asset value per share. Since the market price of the shares will be affected by such factors as the relative demand for and supply of the shares in the market, general market and economic conditions and other factors beyond the control of the Fund, the Fund cannot predict whether the shares will trade at, below or above net asset value or at, below or above the public offering price. Shares of closed-end funds often trade at a discount to their net asset values, and the Fund's shares have in the past and may in the future trade at such a discount. The shares of the

Fund were designed primarily for long-term investors, and investors in the shares should not view the Fund as a vehicle for trading purposes.

**Other Investment Companies Risk.** The Fund may invest up to 10% of the Fund's total assets in securities of other open- or closed-end investment companies, including ETFs, which invest primarily in securities of the types in which the Fund may invest directly. The Fund expects that these investments will be primarily in ETFs. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's investment management fees with respect to the assets so invested. Common shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies.

Rule 12d1-4 of the 1940 Act provides an exemption from Section 12(d)(1) that allows a fund to invest all of its assets in other registered funds, including ETFs, if the fund satisfies certain conditions specified in the Rule, including, among other conditions, that the funds and their advisory group will not control (individually or in the aggregate) an acquired fund (e.g., hold more than 25% of the outstanding voting securities of an acquired fund that is a registered open-end management investment company). However, such control and other conditions under Rule 12d1-4 do not apply if either and acquiring fund is in the same group of investment companies as the acquired fund, or the acquiring fund's subadviser or an affiliate is the acquired fund's adviser.

**Financial Leverage Risk.** Although the Fund has no current intention to do so, the Fund is authorized to utilize leverage through the issuance of preferred shares and/or the Fund may borrow or issue debt securities for financial leveraging purposes and for temporary purposes such as settlement of transactions. Any such financial leverage would be limited to an amount up to 20% of the Fund's total assets (including the proceeds of such financial leverage). Although the use of any financial leverage by the Fund may create an opportunity for increased net income, gains and capital appreciation for the common shares, it also results in additional risks and can magnify the effect of any losses. If financial leverage is utilized, there is no guarantee that it will be successful in enhancing the level of the Fund's current income. If the income and gains earned on securities purchased with financial leverage proceeds are greater than the cost of financial leverage, then the Fund's return will be greater than if financial leverage had not been used. Conversely, if the income or gain from the securities purchased with such proceeds does not cover the cost of financial leverage, the return to the Fund will be less than if financial leverage had not been used. Financial leverage also increases the likelihood of greater volatility of NAV and market price of and dividends on the common shares than a comparable portfolio without leverage.

**Management Risk.** The Fund is subject to management risk because it is an actively managed portfolio. In acting as the Fund's investment manager of its portfolio securities, the Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

**Recent Market Events:** U.S. and international markets have experienced volatility in recent months and years due to a number of economic, political and global macro factors, including the impact of the coronavirus (COVID-19) global pandemic, which resulted in a public health crisis, business interruptions, growth concerns in the U.S. and overseas, travel restrictions, changed social behaviors, rising inflation and reduced consumer spending. While several countries, including the U.S., have begun to lift public health restrictions in efforts to reopen their respective economies, the outbreak of new variants has led to the renewal of health mandates by local governments and businesses, event cancellations and additional travel restrictions, supply chain shortages, cessation of return-to-office plans and an overall economic slowdown. While U.S. and global economies are recovering from the effects of COVID-19, the recovery is proceeding at slower than expected rates and may last for a prolonged period of time. In addition, the impact and spread of infectious diseases in developing or emerging market countries may cause relatively greater strain on those countries' healthcare systems than

those in developed countries. Continuing uncertainties regarding inflation, interest rates, political events, rising government debt in the U.S. and trade tensions have also contributed to market volatility. Global economies and financial markets are increasingly interconnected, which increases the possibility that conditions in one country or region might adversely impact issuers in a different country or region. In particular, a rise in protectionist trade policies, slowing global economic growth, risks associated with epidemic and pandemic diseases, risks associated with the departure of the United Kingdom from the European Union, the risk of trade disputes, and the possibility of changes to some international trade agreements, could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time. Continuing market volatility as a result of recent market conditions or other events may have adverse effects on your account. Madison will monitor developments and seek to manage the Fund in a manner consistent with achieving the Fund's investment objective, but there can be no assurance that they will be successful in doing so.

**Cybersecurity Risk.** The Fund is also subject to cybersecurity risk, which includes the risks associated with computer systems, networks and devices to carry out routine business operations. These systems, networks and devices employ a variety of protections that are designed to prevent cyberattacks. Despite the various cyber protections utilized by the Fund, the Adviser, and other service providers, their systems, networks, or devices could potentially be breached. The Fund, its shareholders, and the Adviser could be negatively impacted as a result of a cybersecurity breach. The Fund cannot control the cybersecurity plans and systems put in place by service providers or any other third parties whose operations may affect the Fund. The Fund does monitor this risk closely.

**Repurchase Agreement Risk.** The Fund bears a risk of loss in the event that the other party to a repurchase agreement defaults on its obligations and the Fund is delayed in or prevented from exercising its rights to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period in which it seeks to assert these rights.

**Reverse Repurchase Agreement Risk.** Reverse repurchase agreements involve the risk that the market value of the securities acquired in connection with the reverse repurchase agreement may decline below the price of the securities the Fund has sold but is obligated to repurchase. Also, reverse repurchase agreements involve the risk that the market value of the securities retained in lieu of sale by the Fund in connection with the reverse repurchase agreement may decline in price. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, such buyer or its trustee or receiver may receive an extension of time to determine whether to enforce the Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision. Also, the Fund would bear the risk of loss to the extent that the proceeds of the reverse repurchase agreement are less than the value of the securities subject to such agreement.

**Securities Lending Risk.** Although the Fund has no current intention to do so, the Fund has the authority to lend its portfolio securities. If the Fund lends its portfolio securities, it may not be able to get them back from the borrower on a timely basis, in which case the Fund may lose certain investment opportunities, as well as the opportunity to vote the securities. The Fund also is subject to the risks associated with the investment of cash collateral, usually fixed income securities risk. If the Fund receives a payment from a borrower in lieu of the dividends on the loaned securities, such payment will generally be taxed as ordinary income for federal income tax purposes and will not be treated as "qualified dividend income."

**Temporary Defensive Position Risk.** In moving to a substantial temporary investments position and in transitioning from such a position back into full conformity with the Fund's normal investment objectives and policies, the Fund may incur transaction costs that would not be incurred if the Fund had remained fully invested in accordance with such normal policies.

## Other Information (unaudited)

**Federal Income Tax Information.** The Fund did not recognize qualified dividend income during the fiscal year ended December 31, 2021. The Fund intends to designate the maximum amount of dividends that qualify for the reduced tax rate pursuant to the Jobs and Growth Tax Relief Reconciliation Act of 2003. For corporate shareholders, 13.47% of the dividends paid by the Fund qualifies for the dividends-received deduction.

Complete information regarding the federal tax status of the distributions received during the calendar year 2021 will be reported in conjunction with Form 1099-DIV.

**Results of Shareholder Vote.** The Annual Meeting of shareholders of the Fund was held on August 27, 2021. Shareholders voted on the election of two Class II Trustees to serve until the 2024 Annual Meeting of Shareholders. The number of shares of the Fund as of June 16, 2021, the “record date,” issued and outstanding and entitled to vote were 20,957,893.

**Proposal 1. Election of Class II Trustees.** Proposal 1 received the requisite votes and was approved. At the Annual Meeting, the holders of 17,469,173 shares (83.35%) were represented in person or by proxy, constituting a quorum. The Class II nominees for Trustee for election by shareholders received the following votes:

<i>Fund's Nominee</i>	<i>For</i>	<i>Withheld</i>
Scott C. Jones	17,010,662	458,512
Paul A. Lefurgey	17,061,679	407,494

Election of Board Trustee Nominees must be approved by the affirmative vote of a majority of the shares present in person at the Annual Meeting or represented by proxy and entitled to vote as long as a quorum is present. Abstentions (or “votes withheld”) have the same effect as a vote against the proposal, but broker non-votes have no effect on the outcome of the vote on the proposal. The Fund’s nominees for Class II Trustees were elected.

**Additional Information.** Notice is hereby given in accordance with Section 23(c) of the 1940 Act that from time to time, the Fund may purchase shares of its common stock in the open market at prevailing market prices.

This report is sent to shareholders of the Fund for their information. It is not a prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or any securities mentioned in this report.

**Regulation Regarding Derivatives.** On October 28, 2020, the Securities and Exchange Commission (the “SEC”) adopted new regulations governing the use of derivatives by registered investment companies (“Rule 18f-4”). The Fund will be required to implement and comply with Rule 18f-4 by August 19, 22. Once implemented, Rule 18f-4 will impose limits on the amount of derivatives a fund can enter into, eliminate the asset segregation framework currently used by funds to comply with Section 18 of the 1940 Act, treat derivatives as senior securities and require funds whose use of derivatives is more than a limited specified exposure amount to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager.

**Forward-Looking Statement Disclosure:** One of our most important responsibilities as investment company managers is to communicate with shareholders in an open and direct manner. Some of our comments in the “Management’s Discussion of Fund Performance” are based on current management expectations and are considered “forward-looking statements.” Actual future results, however, may prove to be different from our expectations. You can identify forward-looking statements by words such as estimate, may, will, expect, believe, plan and other similar terms. We cannot promise future returns. Our opinions are a reflection of our best judgment at the time this report is compiled, and we disclaim any obligation to update or alter forward-looking statements as a result of new information, future events, or otherwise.

**Availability Of Quarterly Portfolio Schedules:** The funds file their complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form NPORT-EX. Form NPORT-EX is available upon request to shareholders at no cost by calling 1-800-877-6089 or on the SEC's website at [www.sec.gov](http://www.sec.gov). Form NPORT-EX may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. More information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

## Discussion Of Contract Renewal Process and Consideration:

At a meeting of the Board of Trustees (the "Board" or "Trustees") of the Madison Covered Call & Equity Strategy Fund (the "Trust" or the "Fund") held on August 5, 2021, the Board, and by a separate vote, the Independent Trustees of the Trust, approved the continuance of the Investment Advisory Agreement between the Trust and Madison Asset Management, LLC (the "Adviser")

In determining whether to approve the continuation of the Investment Advisory Agreement (the "Agreement"), the Adviser furnished information necessary for a majority of the Independent Trustees to make the determination that the continuance of the Agreement was in the best interests of the Fund and its shareholders. The information provided to the Board included: (1) data comparing management fees and expense ratios of comparable investment companies; (2) comparative performance information; (3) the Adviser's and its affiliates' revenues and costs of providing services to the Fund; and (4) information about the Adviser's personnel. Prior to voting, the Independent Trustees reviewed the proposed continuance of the Agreement with management and independent legal counsel to the Independent Trustees and received materials from such counsel discussing the legal standards for their consideration of the proposed continuation of the Agreement. The Independent Trustees also reviewed the proposed continuation of the Agreement with independent legal counsel in a private session at which no representatives of management were present. The Independent Trustees made a variety of additional inquiries regarding the written materials provided by the Adviser and representatives of the Adviser and discussed with the Independent Trustees each of those additional inquiries during the meeting.

In approving the continuance of the Agreement, the Board considered various factors, among them: (1) the nature, extent and quality of services provided by the Adviser to the Fund; (2) the investment performance of the Fund; (3) the costs of the services to be provided and the profits to be realized by the Adviser; (4) economies of scale; and (5) the terms of the Agreement. The Board's analysis of these factors is set forth below. The Independent Trustees were advised by independent legal counsel throughout the process.

With regard to the *nature, extent and quality of the services to be provided by the Adviser*, the Board reviewed the biographies and tenure of the personnel involved in Trust management and the experience of the Adviser and its affiliates as investment manager to other investment companies with similar investment strategies or to individual clients or institutions with similar investment strategies. The Board recognized the wide array of investment professionals employed by the Adviser. Representatives of the Adviser discussed or otherwise presented their investment philosophies and strategies intended to provide investment performance consistent with the Fund's investment objectives in a variety of market environments. The Trustees also noted their familiarity with the Adviser due to the Adviser's history of providing advisory services to the fund.

The Board also discussed the quality of services provided to the Trust by its transfer agent, fund sub-administrator and custodian as well as the various administrative services provided directly by the Adviser.

Based on their review of the information provided, the Board determined with respect to the Fund that the nature, extent and quality of services provided by the Adviser to the Fund were satisfactory.

With regard to the *investment performance of the Fund and the investment adviser*, the Board reviewed current performance information provided in the written Board materials. The Board discussed the reasons for both outperformance and underperformance compared with peer groups and applicable indices and benchmarks. The Board recognized that the usefulness of comparative performance data as a frame of reference to measure the Fund's performance may be limited because the performance peer group, among other things, may not precisely reflect the objectives and strategies of the Fund, may have a different investable universe, or the composition of the peer group may be limited in size or number as well as other factors. They discussed the unique aspects of the

securities markets applicable to particular funds so that the performance of any such funds could be reviewed in context. They reviewed both long-term and short-term performance and considered the effect on long-term performance that may have been attributable to any previous investment advisers/portfolio managers to the Fund or to a different investment strategy. They recognized that the performance data reflects a snapshot in time, in this case as of the end of the most recent calendar year or quarter. They considered that a different performance period, however, could generate significantly different results. Further, they noted that long-term performance can be adversely affected by even one period of significant underperformance so that a single investment decision or theme has the ability to disproportionately affect long-term performance.

The Board also noted that on a quarterly basis, they review detailed information for the Fund, including investment performance results, portfolio composition and investment philosophies, processes, and strategies. In addition, the Board also considered the Adviser's quarterly portfolio commentary and discussion of the Fund's performance. They also considered whether any relative underperformance was appropriate in view of the Adviser's conservative investment philosophy. The Board noted the type of market environments that favor the Fund's strategies and discussed the Fund's performance in such market environments. Representatives of the Adviser discussed with the Board the methodology for arriving at peer groups and indices used for performance comparisons, which with respect to peer groups, followed the same process as the prior year. The Board also considered that sometimes, the Morningstar categories the Fund falls into do not precisely match a Fund's investment strategy and philosophy.

Based on their review, the Board determined that, given the totality of the above factors and considerations, the Fund's overall investment performance had been satisfactory.

With regard to the *costs of the services to be provided and the profits to be realized by the Investment Adviser* from the relationship with the Trust, the Board reviewed the expense ratios for a variety of other funds in the Fund's peer group with similar investment objectives. Like the performance comparisons described above, the expense comparisons followed the same methodology as last year in terms of peer group selection.

The Board noted that the Adviser or its affiliates, provided investment management services to other investment company and/or non-investment company clients and considered the advisory fees charged by the Adviser to such funds and clients for purposes of determining whether the given advisory fee was disproportionately large under the so-called *Gartenberg* standard traditionally used by investment company boards in connection with advisory contract renewal considerations. The Board took those fees into account and considered the differences in services and time required by the various types of funds and clients to which the Adviser provided services. The Board recognized that significant differences may exist between the services provided to one type of fund or client and those provided to others, such as those resulting from a greater frequency of shareholder redemptions in a mutual fund, the higher turnover of mutual fund assets and the additional compliance and regulatory work associated with managing a 1940 Act fund. The Board gave such comparisons the weight that they merit in light of the similarities and differences between the services that the Fund requires. They considered that, if the services rendered by the Adviser to one type of fund or client differed significantly from others, then the comparison should be given less weight. In the case of non-investment company clients for which the Adviser acts as an investment adviser, the Board noted that the fee may be lower than the fee charged to the Fund. The Board noted too the various administrative, operational, compliance, legal and corporate communication services required to be handled by the Adviser which are performed for investment company clients but are not typically performed for non-investment company clients.

The Trustees compared the Fund's total expense ratio and advisory fee to those of comparable funds with similar investment objectives and strategies. The Board noted the relatively simple expense structure maintained by the

Trust, an advisory fee and a capped administrative “services” fee, plus expenses for Trustee compensation which are not covered by the administrative services fee. The Board reviewed total expense ratios paid by other funds with similar investment objectives and asset size, recognizing that such a comparison, while not dispositive, was an important consideration.

With regard to the administrative services provided by the Adviser under a separate Administrative Services Agreement (“Services Agreement”), the Board acknowledged that the Adviser is compensated for the administrative services it provides or arranges to be provided and that such compensation does not always cover all costs incurred by the Adviser because the Services Agreement effectively acts as a cap on administrative expenses. Therefore, the Board recognized that some of the administrative, operational, regulatory or compliance fees or costs in excess of the Services Agreement fees are paid by the Adviser from investment management fees earned. In this regard, the Trustees noted that examination of the Fund’s total expense ratio compared to those of other investment companies was more meaningful than a simple comparison of basic “investment management only” fee schedules.

The Board also noted that the Services Agreement was amended in August 2020 to reflect that Independent Trustee compensation, including Lead Independent Trustee compensation, is no longer being paid by the Adviser from the services fees it receives pursuant to the Services Agreement and, instead, is directly paid by the Fund.

In reviewing costs and profits, the Board noted that for some smaller funds, the salaries of all portfolio management personnel, trading desk personnel, corporate accounting personnel and employees of the Adviser who serve as Trust officers, as well as facility costs (e.g., rent, etc.), could not be supported by fees received from such portfolios alone. However, the Board recognized that the Trust is profitable to the Adviser because such salaries and fixed costs are already paid in whole or in part from revenue generated by management of other client assets managed by the Adviser, including the Trust as a consolidated family of investment companies. The Trustees noted that total assets managed by the Adviser and its affiliates were approximately \$19 billion as of December 31, 2020, and approximately \$25 billion at the time of the meeting. The recent increase in assets was due, in part, to the acquisition of the Milwaukee-based Reinhart Fixed Income team, fixed income investment strategies and clients. As a result, although the fees paid by an individual fund at its present size might not be sufficient to profitably support a stand-alone fund, the Trust is reasonably profitable to the Adviser as part of its larger, diversified organization. In sum, the Trustees recognized that the Trust is important to the Adviser and is managed with the attention given to the Adviser’s other clients.

In considering the renewal of contracts, the Board recognized that the obligations, responsibilities and management considerations involved with being an investment adviser to a closed-end fund differ significantly from serving as an investment adviser to an open-end (mutual) fund. As such, the Board focused its attention on the total expense ratios of certain other closed-end funds with similar investment objectives. The Board determined that the total expense ratio was reasonable based on such comparisons. The Board noted the premium to NAV for the Fund through the second quarter of 2021 was approximately 3.98%.

Following their review, the Board concluded that the costs for services provided by, and the level of profitability to, the Adviser with respect to the Investment Advisory and Services Agreements were reasonable considering the services provided.

With regard to the extent to which *economies of scale* would be realized as the Fund’s assets increase, the Trustees recognized that at their current asset levels, it was premature to discuss any economies of scale not already factored into the compensation payable under existing Investment Advisory and Services Agreements. The Board recognized that another method to help ensure the shareholders share in any economies of scale is to include

breakpoints in the advisory fee schedules. Based on its review, the Board concluded that the current advisory fee schedules and fee arrangements and waivers (as applicable) were appropriate and reflect economies of scale to be shared with shareholders when assets under management increase.

Counsel to the Independent Trustees confirmed that the Trust's Independent Trustees had met previously and reviewed the written contract renewal materials provided by the Adviser regarding the Investment Advisory and Services Agreements. Counsel noted that the Independent Trustees had considered such materials in light of the *Gartenberg* standard as well as criteria either set forth or discussed in the Supreme Court decision in *Jones v. Harris* regarding the investment company contract renewal process under Section 15(c) of the 1940 Act, as amended. The Independent Trustees made a variety of additional inquiries regarding such written materials to the Adviser and representatives of the Adviser provided satisfactory responses thereto.

In considering the renewal of the Fund's Investment Advisory and Services Agreements, the Board, including the Independent Trustees, did not identify any single factor as controlling, and each Trustee may have attributed different weights to the various factors. The Trustees reached the following conclusions regarding the Fund's Agreements, among others: (a) the Adviser demonstrated that it possesses the capability and resources to perform the duties required of it under the Agreements; (b) the Adviser is qualified to manage the Fund's assets in accordance with the Fund's investment objective and strategies; (c) the overall investment performance of the Fund is satisfactory relative to the performance of funds with similar investment objectives and relevant indices and benchmarks; (d) the Fund's advisory and services fees are reasonable in light of the services received by the Fund from the Adviser and other factors considered; and (e) the Adviser's investment strategies are appropriate for pursuing the investment objectives of the Fund. Based on the foregoing conclusions, the Board determined that continuation of the Investment Advisory Agreement and Services Agreement with the Adviser was in the best interests of the Fund and its shareholders.

# Trustees and Officers

The address of each Trustee and Officer of the fund is 550 Science Drive, Madison, Wisconsin 53711.

<sup>1</sup> A Trustee must retire at the end of the calendar year in which the first of the following two events occurs: (1) they attain the age of seventy-six (76), or (2) they have served on the Board for a total of fifteen (15) years, subject in the latter case to extension by unanimous vote of the remaining Trustees on an annual basis. The fifteen (15) year term limitation shall commence on the later of April 19, 2013 or the date of the Trustee's initial election or appointment as a trustee. Board terms end on December 31 of the year noted.

<sup>2</sup> As of the date of this report, the fund complex consists of the Fund, the Madison Funds with 15 portfolios and the Ultra Series Fund with 14 portfolios, for a grand total of 30 separate portfolios in the fund complex.

## Dividend Reinvestment Plan

Unless the registered owner of common shares elects to receive cash by contacting Computershare Trust Company, Inc. (the "Plan Administrator"), all distributions declared on common shares of the Fund will be automatically reinvested by the Plan Administrator in the Fund's Dividend Reinvestment Plan (the "Plan") in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the distribution record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all distributions declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder's common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a "Distribution") payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("Newly Issued Common Shares") or (ii) by purchase of outstanding common shares on the open market ("Open-Market Purchases") on the New York Stock Exchange or elsewhere. If, on the payment date for any Distribution, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Distribution amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Distribution by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Distribution will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Distribution, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Distribution amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Distribution had been paid in Newly Issued Common Shares on the Distribution payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Distribution amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Distribution amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Distribution will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each

shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Distributions will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Distributions.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, Computershare Trust Company, N.A., P.O. Box 505000, Louisville, KY 40233, Phone Number: 1-781-575-4523.

This report is sent to shareholders of Madison Covered Call & Equity Strategy Fund for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

A description of the Fund's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Fund at (800) 368-3195 and is available on the SEC's website at [www.sec.gov](http://www.sec.gov).

Information regarding how the Fund voted proxies for portfolio securities, if applicable, during the most recent 12-month period ended June 30, is also available, without charge and upon request by calling the Fund at (800) 368-3195 or by accessing the Fund's Form N-PX on the SEC's website at [www.sec.gov](http://www.sec.gov).

In August 2021, the Fund submitted a CEO annual certification to the NYSE in which the Fund's principal executive officer certified that he was not aware, as of the date of the certification, of any violation by the Fund of the NYSE's Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Fund's principal executive and principal financial officers have made quarterly certifications, including in filings with the SEC on forms N-CSR and N-PORT, relating to, among other things, the Fund's disclosure controls and procedures and internal control over financial reporting.
