Conservative Allocation Custom Index		2.39	2.39	9.26	1.09	4.55	4.64	-

### Calendar Year Returns<sup>2</sup> (%)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
Class A	5.56	-1.17	4.77	9.68	-2.98	12.44	9.15	2.96	-13.80	7.95
ICE BofA Corp/Govt & Mtg Index	6.37	0.58	2.61	3.63	0.00	8.96	7.64	-1.62	-13.31	5.39
Conservative Allocation Custom Index	6.55	0.09	5.43	10.00	-2.60	15.44	11.81	5.70	-14.59	11.41

Performance data shown represents past performance. Investment returns and principal value will fluctuate, so that fund shares, when redeemed, may be worth more or less than the original cost. Past performance does not guarantee future results and current performance may be lower or higher than the performance data shown. Visit [madisonfunds.com](http://madisonfunds.com) or call 800.877.6089 to obtain performance data current to the most recent month-end.

### 3, 5, & 10-Year Standard Deviation

	3-Year	5-Year	10-Year
Class A	8.61	7.64	6.10
Conservative Allocation Custom Index	9.91	9.03	7.04

1 Growth of \$10,000 for the years indicated is calculated at NAV and assumes all dividends and capital gain distributions were reinvested. It does not take into account sales charges (see Note 2 below) or the effect of taxes.

2 Average annual total returns and calendar year returns assume all distributions are reinvested and reflect applicable fees and expenses. Class A share returns without sales charge would be lower if sales charge were included. Class A share returns with sales charge reflect the deduction of the maximum applicable sales charge of 3.75%. Class B shares have no up-front sales charge. If redeemed within six years, however, B shares are subject to a maximum contingent deferred sales charge ("CDSC") of 4.5%. Class B shares may not be purchased or acquired, except for exchange from Class B shares of another Madison fund, please see the most recent prospectus for details. Class C shares do not have an up-front sales charge, however, C shares are subject to a 1% CDSC on shares redeemed within 12 months of purchase.

3 The fund's expense ratios are based on the most recent prospectus and include the weighted average expenses of the underlying funds in which the fund invests.

Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance.

### Experienced Management

Patrick Ryan, CFA  
Head of Multi-Asset Solutions,  
Portfolio Manager  
Industry since 2000

Stuart Dybdahl, CFA, CAIA  
Portfolio Manager  
Industry since 2014

Standard Deviation: a statistical measurement of dispersion about an average, which, for a portfolio, depicts how widely the returns varied over a certain period of time. Investors may use the standard deviation of historical performance to understand the range of returns for a portfolio. When a portfolio has a higher standard deviation than its benchmark, it implies higher relative volatility. Standard deviation has been calculated using the trailing monthly total returns for the appropriate time period. The standard deviation values are annualized. Downside Capture Ratio: a fund's performance in down markets relative to its benchmark. The security's downside capture return is divided by the benchmark's downside capture return over the time period. Upside Capture Ratio: a fund's performance in up markets relative to its benchmark. The security's upside capture return is divided by the benchmark's upside capture return over the time period. Portfolio Turnover: a measure of the trading activity in an investment portfolio—how often securities are bought and sold by a portfolio. It is calculated at the fund level and represents the entire fiscal year ending 10/31/2022.

Portfolio allocations are subject to change. Diversification does not guarantee a profit or protect against loss. Calculated as a % of Net Assets. Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance. Bloomberg Intermediate Government Credit Index measures the performance of United States dollar-denominated United States Treasuries, government-related and investment-grade United States corporate securities that have a remaining maturity of greater than or equal to one year and less than 10 years. Conservative Allocation Custom Index consists of 24.5% Russell 3000® Index, 10.5% MSCI ACWI ex-USA Index and 65% Bloomberg US Aggregate Bond Index. The Russell 3000 Index measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market. The Russell 3000 Index is constructed to provide a comprehensive, unbiased and stable barometer of the broad market. MSCI ACWI ex USA Index captures large and mid cap representation across 22 of 23 Developed Markets countries (excluding the US) and 23 Emerging Markets countries. With 1,843 constituents, the index covers approximately 85% of the global equity opportunity set outside the US. Bloomberg U.S. Aggregate Bond Index is an unmanaged index

of U.S. fixed income securities. The U.S. Aggregate Index covers the USD-denominated, investment-grade, fixed-rate, taxable bond market of SEC-registered securities. The index includes bonds from the Treasury, Government-Related, Corporate, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS sectors. An investment in the fund is subject to risk and there can be no assurance the fund will achieve its investment objective. The risks associated with an investment in the fund can increase during times of significant market volatility. The principal risks of investing in the fund include: asset allocation risk, equity risk, ETF risk, interest rate risk, credit and prepayment/extension risk, non-investment grade security risk, foreign security and emerging market risk. Investing in foreign markets involves additional risks, including exchange rate changes, political and economic unrest, relatively low market liquidity and the potential difference in financial and accounting controls and standards. The portfolio may invest in small-, mid-sized, or emerging companies, which are susceptible to greater risk than is customarily associated with investing in more established companies. The portfolio may invest in high yield or lower-rated securities, which may provide greater returns but are subject to greater-than-average risk.

The fund is subject to the risks of the underlying funds in direct proportion to the allocation of its assets among the underlying funds. More detailed information regarding these risks can be found in the fund's prospectus.
