Annual Shareholder Report

December 31, 2024

Conservative Allocation Fund Class I

Fund Overview

This annual shareholder report contains important information about Conservative Allocation Fund Class I for the period of January 1, 2024 to December 31, 2024. You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$33	0.32%

How did the Fund perform last year and what affected its performance?

For the first time in a quarter century, the S&P 500 Index turned in back-to-back calendar year returns greater than 20%. Right up until mid-December it looked like 2024 was a lock for the S&P 500 to outgain 2023's 26.3% showing. However, a "hawkish" interest rate cut by the Federal Reserve cooled the mood, and the index stumbled to finish the year with a 25% gain. And while it was generally a very good year for all stocks, with the average S&P 500 stock returning 13%, the continued extreme bifurcation between the largest growth stocks and the "average" stock was notable, making for a rough relative year for those not owning or not owning enough of the "right" stocks. The much hyped Magnificent 7 (Mag-7) stocks produced an average return of over 60% and contributed 53% of the S&P 500 Index's total return in 2024. The Russell 1000 Growth Index, where the Mag-7 exhibits an even greater concentration generated a 33.4% return, versus very respectable absolute, yet less than half as large returns from value, mid, and small cap stock indexes, where returns ranged from 12 – 15%. International equity markets, as measured by the MSCI ACWI ex-US Index, returned a more modest 5.53% for the year.

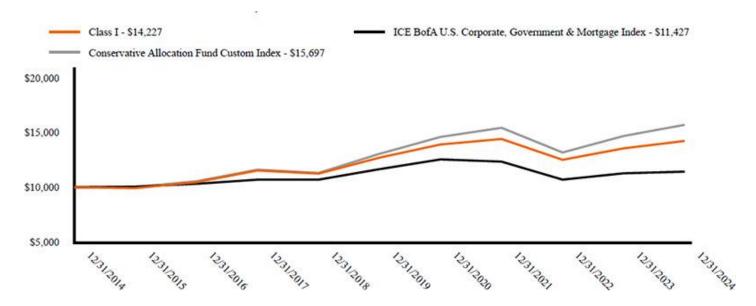

In an odd twist of fate, the Federal Reserve delivered 1% of interest rate cuts between mid-September and year-end, yet the bellwether 10-year US Treasury yield increased an identical 1% from 3.6% to 4.6%. The jump in rates seemed to correspond to the unfortunate realization that rates may stay structurally higher for longer due to sticky inflation and a federal government addicted to debt. Higher rates into year-end made trouble for fixed income investors and spoiled what had been a decent year for bonds. The benchmark Bloomberg US Aggregate Bond Index fell -3.1% over the final quarter, taking the full year return down to +1.3% from +4.4% on September 30th.

The Fund's absolute return was aided by the strong US equity market backdrop. Across equities, the Fund benefited from an overweight to the US Technology sector and a heavy preference for domestic versus international stocks. However, our economic outlook and conservative DNA had us guarded for a more challenging market throughout much of the year and the Fund's underweight to equity risk (overweight to cash) provided a headwind to relative performance. Within our US equity allocation, our core positions were light on the Mag-7 and failed to keep up with the highly concentrated mega cap led market, which compounded the hit to relative performance. The Fund's fixed income allocation outperformed the benchmark Bloomberg US Aggregate Bond Index via a combination of our position in mortgage-backed securities, yield curve positioning and the strong showing from the Fund's core actively managed bond fund position.

We ended the period cautiously optimistic for the year ahead, and while still a touch defensive overall, we have increased equity exposure by expanding our allocations to smaller cap stocks and the financial sector.

Conservative Allocation Fund Class I

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	4.99%	2.29%	3.59%
ICE BofA U.S. Corporate, Government & Mortgage Index	1.35%	(0.39%)	1.34%
Conservative Allocation Fund Custom Index	6.95%	3.76%	4.61%

- 1. Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.
- 2. The ICE BofA U.S. Corporate, Government & Mortgage Index is a broad-based measure of the total rate of return performance of the U.S. investment-grade bond markets. The index is a capitalization-weighted aggregation of outstanding U.S. treasury, agency and supranational mortgage pass-through, and investment-grade corporate bonds meeting specified selection criteria.
- 3. The Conservative Allocation Fund Custom Index consists of 65% Bloomberg US Aggregate Bond Index, 24.5% Russell 3000[®] Index and 10.5% MSCI ACWI ex-USA Index (net). The Custom Index is calculated using a monthly re-balancing frequency (i.e., rebalanced back to original constituent weight every calendar month-end).

Key Fund Statistics (As of December 31, 2024)

In an odd twist of fate, the Federal Reserve delivered 1% of interest rate cuts between mid-September and year-end, yet the bellwether 10-year US Treasury yield increased an identical 1% from 3.6% to 4.6%. The jump in rates seemed to correspond to the unfortunate realization that rates may stay structurally higher for longer due to sticky inflation and a federal government addicted to debt. Higher rates into year-end made trouble for fixed income investors and spoiled what had been a decent year for bonds. The benchmark Bloomberg US Aggregate Bond Index fell -3.1% over the final quarter, taking the full year return down to +1.3% from +4.4% on September 30th.

The Fund's absolute return was aided by the strong US equity market backdrop. Across equities, the Fund benefited from an overweight to the US Technology sector and a heavy preference for domestic versus international stocks. However, our economic outlook and conservative DNA had us guarded for a more challenging market throughout much of the year and the Fund's underweight to equity risk (overweight to cash) provided a headwind to relative performance. Within our US equity allocation, our core positions were light on the Mag-7 and failed to keep up with the highly concentrated mega cap led market, which compounded the hit to relative performance. The Fund's fixed income allocation outperformed the benchmark Bloomberg US Aggregate Bond Index via a combination of our position in mortgage-backed securities, yield curve positioning and the strong showing from the Fund's core actively managed bond fund position.

We ended the period cautiously optimistic for the year ahead, and while still a touch defensive overall, we have increased equity exposure by expanding our allocations to smaller cap stocks and the financial sector.

Aggressive Allocation Fund Class I		

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	9.08%	5.05%	6.24%
S&P 500 [®] Index	25.02%	14.53%	13.10%
Aggressive Allocation Fund Custom Index	14.61%	8.79%	8.58%

- 1. Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.
- 2. The S&P 500[®] Index is a large-cap market index which measures the performance of a representative sample of 500 leading companies in leading industries in the U.S.
- 3. The Aggressive Allocation Fund Custom Index consists of 20% Bloomberg US Aggregate Bond Index, 56% Russell 3000[®] Index and 24% MSCI ACWI ex-USA Index (net). The Custom Index is calculated using a monthly re-balancing frequency (i.e., rebalanced back to original constituent weight every calendar month-end).

Annual Shareholder Report December 31, 2024

Aggressive Allocation Fund Class I

Aggressive Allocation Fund Class II

Fund Overview

This annual shareholder report contains important information about Aggressive Allocation Fund Class II for the period of January 1, 2024 to December 31, 2024. You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class II	\$61	0.58%

How did the Fund perform last year and what affected its performance?

For the first time in a quarter century, the S&P 500 Index turned in back-to-back calendar year returns greater than 20%. Right up until mid-December it looked like 2024 was a lock for the S&P 500 to outgain 2023's 26.3% showing. However, a "hawkish" interest rate cut by the Federal Reserve cooled the mood, and the index stumbled to finish the year with a 25% gain. And while it was generally a very good year for all stocks, with the average S&P 500 stock returning 13%, the continued extreme bifurcation between the largest growth stocks and the "average" stock was notable, making for a rough relative year for those not owning or not owning enough of the "right" stocks. The much hyped Magnificent 7 (Mag-7) stocks produced an average return of over 60% and contributed 53% of the S&P 500 Index's total return in 2024. The Russell 1000 Growth Index, where the Mag-7 exhibits an even greater concentration generated a 33.4% return, versus very respectable absolute, yet less than half as large returns from value, mid, and small cap stock indexes, where returns ranged from 12 – 15%. International equity markets, as measured by the MSCI ACWI ex-US Index, returned a more modest 5.53% for the year.

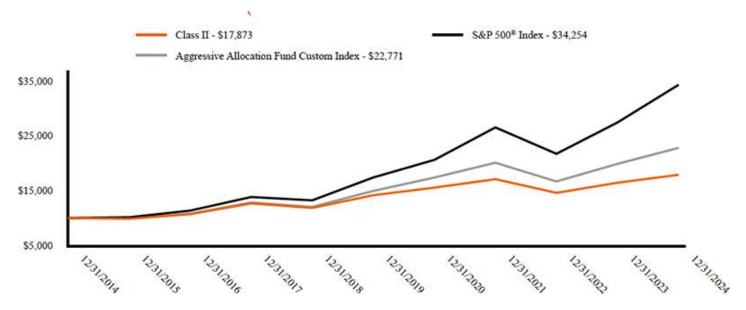

In an odd twist of fate, the Federal Reserve delivered 1% of interest rate cuts between mid-September and year-end, yet the bellwether 10-year US Treasury yield increased an identical 1% from 3.6% to 4.6%. The jump in rates seemed to correspond to the unfortunate realization that rates may stay structurally higher for longer due to sticky inflation and a federal government addicted to debt. Higher rates into year-end made trouble for fixed income investors and spoiled what had been a decent year for bonds. The benchmark Bloomberg US Aggregate Bond Index fell -3.1% over the final quarter, taking the full year return down to +1.3% from +4.4% on September 30th.

Annual Shareholder Report December 31, 2024

Aggressive Allocation Fund Class II

Diversified Income Fund Class I

Fund Overview

This annual shareholder report contains important information about Diversified Income Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$28	0.27%

How did the Fund perform last year and what affected its performance?

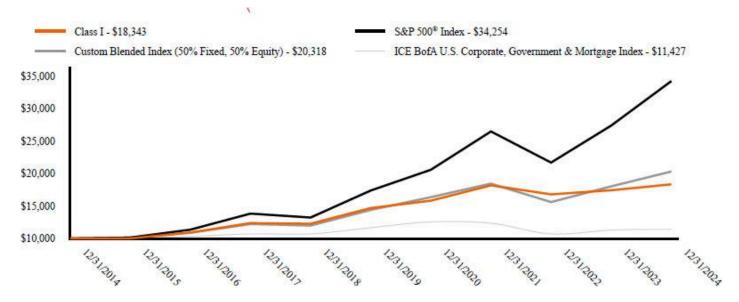

For the first time in a quarter century, the S&P 500 Index turned in back-to-back calendar year returns greater than 20%. Right up until mid-December it looked like 2024 was a lock for the S&P 500 to outgain 2023's 26.3% showing. However, a "hawkish" interest rate cut by the Federal Reserve cooled the mood, and the index stumbled to finish the year with a 25% gain. And while it was generally a very good year for all stocks, with the average S&P 500 stock returning 13%, the continued extreme bifurcation between the largest growth stocks and the "average" stock was notable, making for a rough relative year for those not owning or not owning enough of the "right" stocks. The much hyped Magnificent 7 (Mag-7) stocks produced an average return of over 60% and contributed 53% of the S&P 500 Index's total return in 2024. The Russell 1000 Growth Index, where the Mag-7 exhibits an even greater concentration, generated a 33.4% return. Value and dividend stocks paled in comparison, with the Russell 1000 Value Index returning 14.4% and the S&P 500 Dividend Aristocrats Index up just 4.6%.

Contrary to the equity market, where yield seeking detracted from return, yield was the big winner within bonds. Investors poured money into both high yield ("junk") and investment grade corporates alike, ratcheting their spreads over equivalent US Treasuries to historically low levels. The Bloomberg US Corporate High Yield Index return of 8.2% far outpaced the modest 1.3% return for the Bloomberg US Aggregate Bond Index.

Given 2024's stock market backdrop, the Fund's focus on equity income was a strong headwind to relative performance. Our core covered call position provided the largest drag to the Fund's return. The strategy provides a very high level of income for the Fund but is prone to sizeable underperformance in runaway-up markets like 2024, where potential gains get called away. Our dividend-based holdings also failed to keep pace yet performed well relative to the Dividend Aristocrats Index. Fixed income performance was strong relative to the 1.3% return on the Bloomberg US Aggregate Bond Index, with three of our four core bond holdings outperforming for the year.

Diversified Income Fund Class I

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years

Annual Shareholder Report December 31, 2024

Diversified Income Fund Class II

Core Bond Fund Class I

Fund Overview

This annual shareholder report contains important information about Core Bond Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$57	0.57%

How did the Fund perform last year and what affected its performance?

The final quarter of the year brought better employment data, sticky inflation, solid economic growth and a new administration with a focus on tariffs and tax cuts. Even with this backdrop, the Fed continued to cut interest rates with the Federal Funds rate ending the year in a range of 4.25 to 4.50%, cementing 1% worth of cuts for the full year. However, when the latest version of the Fed's summary of economic projections was released in December, the Fed removed interest rate cuts and increased expected core inflation in 2025 and 2026. The shift in forecast by the Fed indicates a genuine concern for the proposed policies of the incoming administration. Tariffs will most likely increase inflation, and this coupled with tax cut extensions for individuals and lower overall business taxes could produce economic consequences that are not aligned with the Fed's long-term goals.

The yield curve steepened during the year with the 10-year and 30-year Treasury increasing by 69 and 75 (bps), to 4.57% and 4.78%, respectively. However, the 2-year Treasury moved lower by only 1 bp to 4.24%. The spread between 10-year and 2-year Treasuries now sits at 33 bps, the highest level since early 2022. The steepening of the yield curve created a bifurcation in performance. For the year, the Bloomberg US Treasury Intermediate Index returned 2.42% while the Bloomberg US Treasury Long Index returned —6.41%. The current market pricing suggests 2 cuts for 2025 and only 1 additional cut in 2026. More importantly, the current market pricing for the long-term neutral rate is between 3.50 to 3.75%. If core inflation continues to stay at or above 2.5% with economic growth remaining solid, the long-term neutral rate might have to move higher thus pushing the yield curve steeper.

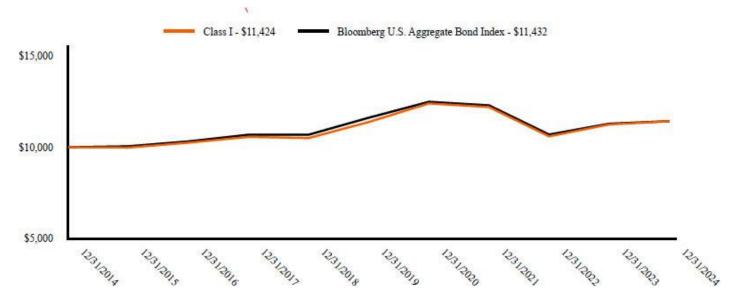

Corporate bonds continued to perform well during the year with spreads tightening across all rating classes. Lower quality outperformed higher quality with Baa-rated corporate bonds outperforming A-rated bonds by a significant amount. The basis for the strong corporate bond performance is the low odds of an economic slowdown over the next 6 to 12 months. While it is likely that the U.S. economy continues to achieve decent economic growth, there are uncertainties regarding economic policies the new administration might implement, which could create an environment of heightened volatility. Given that the starting level of corporate spreads are nearly 20-year tights, there is limited cushion to absorb any volatility.

Mortgage-backed securities (MBS) and asset backed securities (ABS) outperformed Treasuries due to a risk on sentiment for most of the year. MBS outperformed slightly due to high starting yield, steeper yield curves and lower volatility. ABS had strong performance as a risk on appetite drove spreads tighter.

The Fund was less aggressive in adding corporate bonds when compared to prior years. The Fund added MBS and ABS during the year and trimmed treasury positions.

Core Bond Fund Class I

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	1.52%	0.07%	1.34%

Annual Shareholder Report December 31, 2024

Core Bond Fund Class II

Fund Overview

This annual shareholder report contains important information about Core Bond Fund Class II for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class II	\$83	0.82%

How did the Fund perform last year and what affected its performance?

The final quarter of the year brought better employment data, sticky inflation, solid economic growth and a new administration with a focus on tariffs and tax cuts. Even with this backdrop, the Fed continued to cut interest rates with the Federal Funds rate ending the year in a range of 4.25 to 4.50%, cementing 1% worth of cuts for the full year. However, when the latest version of the Fed's summary of economic projections was released in December, the Fed removed interest rate cuts and increased expected core inflation in 2025 and 2026. The shift in forecast by the Fed indicates a genuine concern for the proposed policies of the incoming administration. Tariffs will most likely increase inflation, and this coupled with tax cut extensions for individuals and lower overall business taxes could produce economic consequences that are not aligned with the Fed's long-term goals.

The yield curve steepened during the year with the 10-year and 30-year Treasury increasing by 69 and 75 (bps), to 4.57% and 4.78%, respectively. However, the 2-year Treasury moved lower by only 1 bp to 4.24%. The spread between 10-year and 2-year Treasuries now sits at 33 bps, the highest level since early 2022. The steepening of the yield curve created a bifurcation in performance. For the year, the Bloomberg US Treasury Intermediate Index returned 2.42% while the Bloomberg US Treasury Long Index returned -6.41%. The current market pricing suggests 2 cuts for 2025 and only 1 additional cut in 2026. More importantly, the current market pricing for the long-term neutral rate is between 3.50 to 3.75%. If core inflation continues to stay at or above 2.5% with economic growth remaining solid, the long-term neutral rate might have to move higher thus pushing the yield curve steeper.

Corporate bonds continued to perform well during the year with spreads tightening across all rating classes. Lower quality outperformed higher quality with Baa-rated corporate bonds outperforming A-rated bonds by a significant amount. The basis for the strong corporate bond performance is the low odds of an economic slowdown over the next 6 to 12 months. While it is likely that the U.S. economy continues to achieve decent economic growth, there are uncertainties regarding economic policies the new administration might implement, which could create an environment of heightened volatility. Given that the starting level of corporate spreads are nearly 20-year tights, there is limited cushion to absorb any volatility.

Mortgage-backed securities (MBS) and asset backed securities (ABS) outperformed Treasuries due to a risk on sentiment for most of the year. MBS outperformed slightly due to high starting yield, steeper yield curves and lower volatility. ABS had strong performance as a risk on appetite drove spreads tighter.

The Fund was less aggressive in adding corporate bonds when compared to prior years. The Fund added MBS and ABS during the year and trimmed treasury positions.

Core Bond Fund Class II

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class II	1.27%	(0.18%)	1.09%
Bloomberg U.S. Aggregate Bond Index	1.25%	(0.33%)	1.35%

^{1.} Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.

Annual Shareholder Report December 31, 2024

High Income Fund Class I

Fund Overview

This annual shareholder report contains important information about High Income Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089. This report describes certain planned changes to the Fund that occurred subsequent to the reporting period.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$80	0.78%

How did the Fund perform last year and what affected its performance?

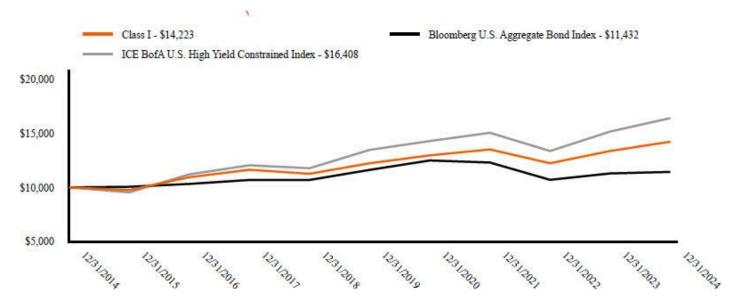

In 2024, the high yield market experienced a significant gain, most of which coming in the second half of the year. Fundamentally, the economy remains strong, inflation has moderated, and the Federal Reserve cut interest rates by 100 bps. With this backdrop, spreads tightened significantly during the year, which helped lower rated bonds perform the best. ICE BofA CCC & Lower High Yield Index had a total return of 18.18% significantly outperforming the ICE BofA BB High Yield Index which only returned 6.28%.

During the year, the Ultra Series High Income Fund Class I returned 6.40% lagging the ICE BofA High Yield Constrained Index which returned 8.20%. Strong performance in short-dated, B-rated industrials bonds helped drive performance, as did consumer lending names which benefited from lower borrowing rates and a resilient consumer that continued to spend.

The Fund continued with its more conservative credit posture and maintained an underweight to CCC-rated bonds. This underweight was the biggest driver of underperformance versus the benchmark. The Fund was less aggressive in adding new issues when compared to prior years. Strong demand and lower concessions made it difficult to participate in new deals when compared to prior periods.

High Income Fund Class I		

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	6.40%	3.07%	3.59%
Bloomberg U.S. Aggregate Bond Index	1.25%	(0.33%)	1.35%
ICE BofA U.S. High Yield Constrained Index	8.20%	4.03%	5.08%

- 1. Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.
- 2. The fund's performance information included in the line graph and table above is compared with a regulatory required index that represents an overall securities market (Regulatory Benchmark). In addition, the line graph and table may also include one or more indexes that more closely aligns to the fund's investment strategy (Strategy Benchmark(s)). Due to new SEC Rules on shareholder reporting the fund adopted a new broad-based securities market index, referred to as the Regulatory Benchmark.
- 3. The Bloomberg U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government related and corporate securities, mortgage-backed securities, asset backed securities and commercial mortgage-backed securities.
- 4. The ICE BofA U.S. High Yield Constrained Index tracks the performance of below investment grade U.S. dollar denominated corporate bonds publicly issued in the U.S. domestic market, but limits any individual issuer to a maximum weighting of 2%.

Annual Shareholder Report December 31, 2024

High Income Fund Class II

Large Cap Value Fund Class I

Fund Overview

This annual shareholder report contains important information about Large Cap Value Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$66	0.63%

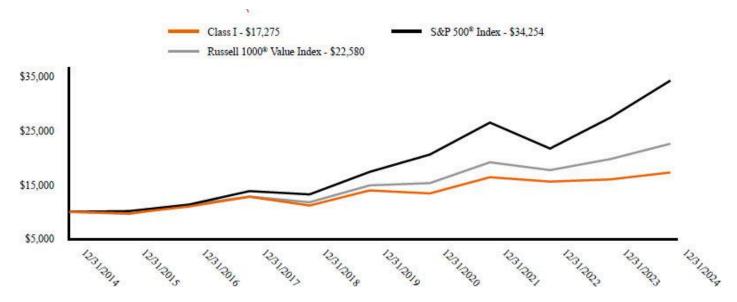

How did the Fund perform last year and what affected its performance?

Relative to the index, sector allocation was neutral, and stock selection was detractive to results. For sector allocation, an underweight position in Health Care positively impacted performance but was offset by an overweight position in Energy. For stock selection, there was a positive contribution from Consumer Discretionary, which was more than offset by weakness in Consumer Staples, Communication Services, Energy, Real Estate, Industrials, and Financials.

Within Financials, wealth management firm Morgan Stanley (MS) was the most additive stock in the portfolio as it benefitted from an improved outlook for capital markets activity. Asset manager BlackRock (BLK) and global money center firm Bank of America (BAC) also contributed nicely to performance as prospects of lower regulations were viewed favorably by market participants. Other notable outperforming stocks were payroll service provider Automatic Data Processing (ADP) and truck engine manufacturer Cummins (CMI) within Industrials. On the negative side, in Real Estate, wireless tower operator American Tower (AMT) was the most detractive stock in the portfolio. It was hurt in the short term by higher interest rates. In Communication Services, media conglomerate Comcast (CMCSA) negatively impacted results due to concerns about shrinking broadband subscribers. In Consumer Staples, agricultural processor Archer-Daniels-Midland (ADM) underperformed after it announced accounting irregularities. The Fund sold ADM after that announcement as the thesis was no longer intact. Other notable underperforming stocks were pharmaceutical company Bristol-Myers Squibb (BMY) in Health Care and railroad operator Union Pacific (UNP) in Industrials. The fund continues to hold all stocks mentioned above except for ADM.

Annual Shareholder Report December 31, 2024

Large Cap Growth Fund Class I

Fund Overview

This annual shareholder report contains important information about Large Cap Growth Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$90	0.83%

How did the Fund perform last year and what affected its performance?

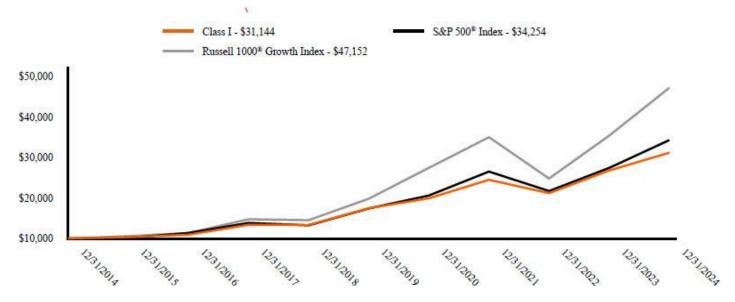

Overall, our concentrated yet diverse collection of above-average businesses performed well, and the Fund's returns were strong for the year, but they were less than the index's returns. We are disappointed to have trailed our benchmark, but we remain focused on producing satisfactory results through a full market cycle rather than individual years. Our aim is to assemble an all-weather portfolio of resilient, growing, well-managed, and conservatively capitalized companies.

We believe the sentiment in financial markets for the period is best characterized as speculative or risk seeking. The Fund's returns have historically trailed those of broader market indices during periods when the prevailing sentiment is risk-seeking.

Portfolio turnover was 9%, below our typical annual range of 20%-30%. During the period we exited two portfolio companies and initiated new positions in three companies; Deere & Company, Keysight Technologies, Inc., and Starbucks Corporations. Importantly, each of these new additions meets our three investment pillars: good business model, high-quality management, and attractive valuation.

Large Cap Growth Fund			

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	16.41%	12.27%	12.03%
S&P 500 [®] Index	25.02%	14.53%	13.10%
Russell 1000 [®] Growth Index	33.36%	18.96%	16.78%

- 1. Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.
- 2. The fund's performance information included in the line graph and table above is compared with a regulatory required index that represents an overall securities market (Regulatory Benchmark). In addition, the line graph and table may also include one or more indexes that more closely aligns to the fund's investment strategy (Strategy Benchmark(s)). Due to new SEC Rules on shareholder reporting the fund adopted a new broad-based securities market index, referred to as the Regulatory Benchmark.
- 3. The S&P $500^{\$}$ Index is a large-cap market index which measures the performance of a representative sample of 500 leading companies in leading industries in the U.S.
- 4. The Russell 1000[®] Growth Index is a large-cap market index which measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values.

Annual Shareholder Report December 31, 2024

Large Cap Growth Fund Class II

Mid Cap Fund Class I

Fund Overview

This annual shareholder report contains important information about Mid Cap Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$97	0.92%

How did the Fund perform last year and what affected its performance?

Our underperformance came from stock selection. The top three contributors were Brown & Brown, Arch Capital Group, and Liberty Formula One. The top three detractors were Dollar Tree, CDW, and Brown-Forman. Sector allocation helped, most notably our underweight in Materials and Health Care, along with our overweight in Financials.

Brown & Brown is generating strong organic growth, and margins are expanding after a few stagnant years. Arch Capital continued to produce solid underwriting results and premium growth. And while there are signs the hard insurance market is entering the later innings, we remain confident in management's ability to manage through the full cycle. Liberty Formula One, owner of the 'F1' international motor racing league, continues to produce strong results. This season has proven to be quite competitive, driving up attendance and viewership of the races, which, in turn, provides a solid foundation for future growth in media rights renewals and sponsorships.

Dollar Tree is facing headwinds from a weak low-end consumer, less 'trade-down' benefit from middle-income consumers, and a tough competitive environment. Despite these headwinds, we remain confident in the company's long-term prospects as we believe the strategic plan management is executing will result in much higher earnings power. CDW underperformed amid a weak IT spending environment, amplified by the company's outsized exposure to small and medium-sized businesses. Brown- Forman came under pressure as investors debate the company's future growth and earnings prospects in light of risks from GLP-1 drugs, changing consumer behaviors, competition, and tariffs.

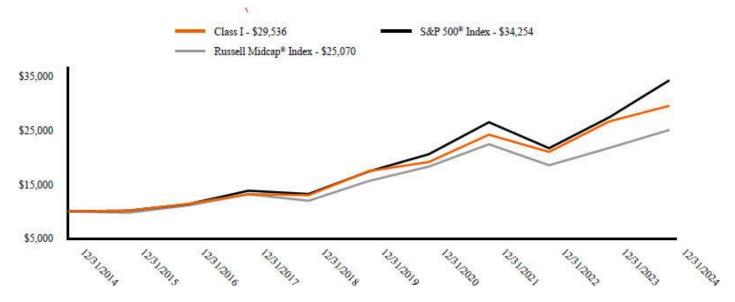

Portfolio turnover was 15%, which was below our historical average of 20% to 30%, primarily due to our continued high conviction in our largest holdings and their reasonable stock valuations. During the year, we established five new positions and exited three positions.

New Positions: Cullen/Frost Bankers is a high-quality regional bank based in San Antonio, led by a strong team that has demonstrated the ability to successfully enter new markets. Teledyne Technologies is a well-managed sensor and instrumentation manufacturer, with a track record of shareholder-oriented actions. Graco is a leading manufacturer of premium fluid handling equipment, with a strong customer value proposition that has resulted in high returns on invested capital. Asbury Automotive and Lithia Motors are two of the largest auto franchise dealer groups in the country. Investors tend to pay a lot of attention to new car sales, but dealers actually earn more in profits from parts and service, and this steady business provides a nice ballast throughout the economic cycle.

Exited positions: Brookfield Corp, which was spun out of its asset management business, Brookfield Asset Management (BAM), was sold because we decided to concentrate our investment in BAM, given its cleaner balance sheet. We sold Take-Two Interactive Software after the stock had advanced to a level that adequately reflected the risks and rewards of the large slate of new game launches expected in 2025 and 2026. Finally, though the opportunity to continue gaining share still exists, we sold CarMax because we believe it will be harder to do so given various changing industry dynamics.

Annual Shareholder Report December 31, 2024

Mid Cap Fund Class II

International Stock Fund Class I

Fund Overview

This annual shareholder report contains important information about International Stock Fund Class I for the period of January 1, 2024 to December 31, 2024.

You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089. This report describes certain planned changes to the Fund that occurred subsequent to the reporting period.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$117	1.17%

How did the Fund perform last year and what affected its performance?

International equity markets broadly advanced over the period. Declining inflation levels and other reassuring economic data gave most major central banks the confidence to initiate interest rate cuts. China also stepped-up stimulus efforts to tackle its economic malaise, though left the market wanting more fiscal support. Concurrently, the military situations in Ukraine and the Middle East continued to elevate geopolitical risk, but with the latter now de-escalating somewhat. Also, political elections in many countries impacted sentiment and volatility. The benchmark return was positive over the period, with all regions advancing led by North America and Japan. Among the sector breakdown, Financials and Information Technology advanced the most, while Materials and Consumer Staples experienced the steepest decline.

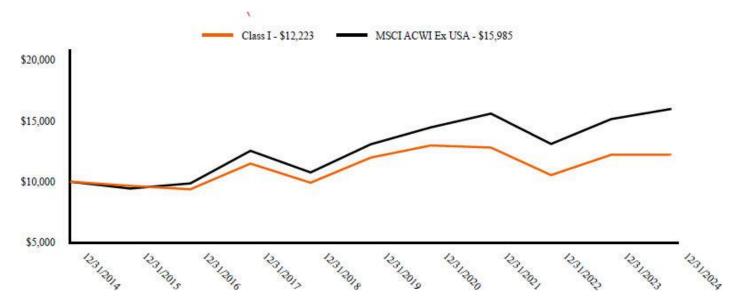

Looking at the relative underperformance of the Portfolio, all regions except for North America detracted, led by Japan because of negative stock selection. Among economic sectors, Financials was the clear weak point because of negative allocation and selection effects, followed by Consumer Staples from negative allocation, stock selection, and currency effects. Among the contributors, Communication Services and Consumer Discretionary led, driven by positive allocation and stock selection effects. Given the positive return of the benchmark, the cash position slightly detracted.

Portfolio structure is determined using bottom-up stock selection within a risk-controlled framework, and positioning shifted somewhat in certain regions and sectors over the one-year period. Of the three geographic buckets the Portfolio is viewed on relative to the benchmark, the Developed Europe overweight narrowed mainly because of a net reduction of two stocks, while the Other Developed underweight went to an overweight primarily from adding one new stock. Looking at sector positioning, the relative underweight in Financials increased despite one net addition, mainly because the performance in Financials was so strong, which increased its weight in the index. One stock was sold in Consumer Staples but positioning still moved more overweight, from adjustments to existing positions and a decline in the index weight. The Information Technology overweight narrowed for various reasons including selling one name. There was also movement in the relative positioning of other sectors including Industrials, Consumer Discretionary, Health Care, and Communication Services through adjustments to existing positions and/or index weight movement. During the fiscal year, two stocks were new buys, and three were complete eliminations for profit taking or better opportunities.

Our global growth and inflation expectations going into the new year are more moderate. We anticipate some continued support from central banks in many countries as they carefully reduce policy interest rates with the aim of economic stability and strength. Resolutely, our team will implement our consistent investment selection process to construct a balanced portfolio of quality growth companies with stable franchises on a long-term view.

International Stock Fu	ınd
------------------------	-----

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	0.10%	0.41%	2.03%
MSCI ACWI Ex USA	5.53%	4.10%	4.80%

^{1.} Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.

2. The MSCI ACWI ex USA Index (net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI ex USA (net) is calculated on a total return basis with dividends reinvested after the deduction of withholding taxes.

How did the Fund perform last year and what affected its performance?

International equity markets broadly advanced over the period. Declining inflation levels and other reassuring economic data gave most major central banks the confidence to initiate interest rate cuts. China also stepped-up stimulus efforts to tackle its economic malaise, though left the market wanting more fiscal support. Concurrently, the military situations in Ukraine and the Middle East continued to elevate geopolitical risk, but with the latter now de-escalating somewhat. Also, political elections in many countries impacted sentiment and volatility. The benchmark return was positive over the period, with all regions advancing led by North America and Japan. Among the sector breakdown, Financials and Information Technology advanced the most, while Materials and Consumer Staples experienced the steepest decline.

Looking at the relative underperformance of the Portfolio, all regions except for North America detracted, led by Japan because of negative stock selection. Among economic sectors, Financials was the clear weak point because of negative allocation and selection effects, followed by Consumer Staples from negative allocation, stock selection, and currency effects. Among the contributors, Communication Services and Consumer Discretionary led, driven by positive allocation and stock selection effects. Given the positive return of the benchmark, the cash position slightly detracted.

Portfolio structure is determined using bottom-up stock selection within a risk-controlled framework, and positioning shifted somewhat in certain regions and sectors over the one-year period. Of the three geographic buckets the Portfolio is viewed on relative to the benchmark, the Developed Europe overweight narrowed mainly because of a net reduction of two stocks, while the Other Developed underweight went to an overweight primarily from adding one new stock. Looking at sector positioning, the relative underweight in Financials increased despite one net addition, mainly because the performance in Financials was so strong, which increased its weight in the index. One stock was sold in Consumer Staples but positioning still moved more overweight, from adjustments to existing positions and a decline in the index weight. The Information Technology overweight narrowed for various reasons including selling one name. There was also movement in the relative positioning of other sectors including Industrials, Consumer Discretionary, Health Care, and Communication Services through adjustments to existing positions and/or index weight movement. During the fiscal year, two stocks were new buys, and three were complete eliminations for profit taking or better opportunities.

Our global growth and inflation expectations going into the new year are more moderate. We anticipate some continued support from central banks in many countries as they carefully reduce policy interest rates with the aim of economic stability and strength. Resolutely, our team will implement our consistent investment selection process to construct a balanced portfolio of quality growth companies with stable franchises on a long-term view.

International Stock Fund		

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class II	(0.15%)	0.16%	1.77%
MSCI ACWI Ex USA	5.53%	4.10%	4.80%

- 1. Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. **The Fund's past performance is not indicative of future performance.**
- 2. The MSCI ACWI ex USA Index (net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI ex USA (net) is calculated on a total return basis with dividends reinvested after the deduction of withholding taxes.

Annual Shareholder Report December 31, 2024

Madison Target Retirement 2020 Fund Class I

Fund Overview

This annual shareholder report contains important information about Madison Target Retirement 2020 Fund Class I for the period of January 1, 2024 to December 31, 2024. You can find additional information about the Fund at www.madisonfunds.com/funds/ultra-series-fund/. You can also request this information by contacting us at 1-800-877-6089.

What were the Fund costs for last year?

(based on a hypothetical \$10,000 investment)

	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$32	0.31%

How did the Fund perform last year and what affected its performance?

For the first time in a quarter century, the S&P 500 Index turned in back-to-back calendar year returns greater than 20%. Right up until mid-December it looked like 2024 was a lock for the S&P 500 to outgain 2023's 26.3% showing. However, a "hawkish" interest rate cut by the Federal Reserve cooled the mood, and the index stumbled to finish the year with a 25% gain. And while it was generally a very good year for all stocks, with the average S&P 500 stock returning 13%, the continued extreme bifurcation between the largest growth stocks and the "average" stock was notable, making for a rough relative year for those not owning or not owning enough of the "right" stocks. The much hyped Magnificent 7 (Mag-7) stocks produced an average return of over 60% and contributed 53% of the S&P 500 Index's total return in 2024. The Russell 1000 Growth Index, where the Mag-7 exhibits an even greater concentration generated a 33.4% return, versus very respectable absolute, yet less than half as large returns from value, mid, and small cap stock indexes, where returns ranged from 12 – 15%.

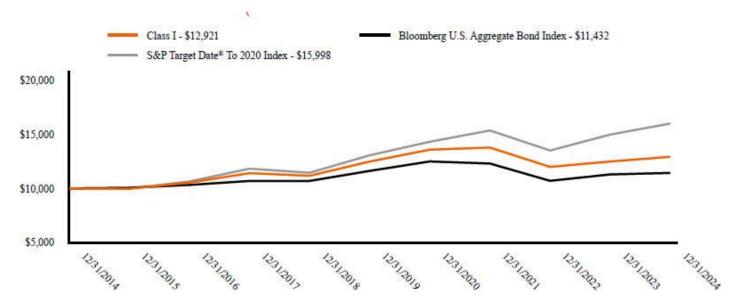

In an odd twist of fate, the Federal Reserve delivered 1% of interest rate cuts between mid-September and year-end, yet the bellwether 10-year US Treasury yield increased an identical 1% from 3.6% to 4.6%. The jump in rates seemed to correspond to the unfortunate realization that rates may stay structurally higher for longer due to sticky inflation and a federal government addicted to debt. Higher rates into year-end made trouble for fixed income investors and spoiled what had been a decent year for bonds. The benchmark Bloomberg US Aggregate Bond Index fell -3.1% over the final quarter, taking the full year return down to +1.3% from +4.4% on September 30th.

The Fund's absolute return was aided by the strong US equity market backdrop as we maintained our strong overweight to US stocks versus international stocks throughout the year. In addition, the Fund's fixed income allocation outperformed the benchmark Bloomberg US Aggregate Bond Index via a combination of our position in mortgage-backed securities and yield curve positioning. Within the Fund's US equity allocation, our overweight to the US Technology sector and a quality-based strategy benefited the portfolio and within international equity allocations, positions in Japan and Emerging Markets Asia proved beneficial. However, our economic outlook and conservative DNA had us guarded for a more challenging market throughout much of the year. The Fund's underweight to equity risk (overweight to cash) provided a headwind to relative performance and within our US equity allocation, our core positions were light on the Mag-7 and as a result failed to keep up with the highly concentrated mega cap led market, which compounded the hit to relative performance.

We ended the period cautiously optimistic for the year ahead, and while still a touch defensive overall, we have increased equity exposure by expanding our allocations to smaller cap stocks and the financial sector.

Madison Target Retirement 2020 Fund Class I

The chart below illustrates the total value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or for the life of the Fund if shorter).

Average Annual Total Returns (%)

	1 Year	5 Years	10 Years
Class I	3.48%	0.69%	2.60%
Bloomberg U.S. Aggregate Bond Index	1.25%	(0.33%)	1.35%
S&P Target Date® To 2020 Index	6.81%	4.14%	4.81%

- 1. Fund returns are calculated after fund expenses have been subtracted and assume that dividends and capital gains are reinvested in additional shares of a fund. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investment return and principal value will fluctuate, so an investor's shares, when redeemed, may be worth more or less than original cost. Further information relating to the Fund's performance is contained in the prospectus and elsewhere in this report. The Fund's past performance is not indicative of future performance.
- 2. The fund's performance information included in the line graph and table above is compared with a regulatory required index that represents an overall securities market (Regulatory Benchmark). In addition, the line graph and table may also include one or more indexes that more closely aligns to the fund's investment strategy (Strategy Benchmark(s)). Due to new SEC Rules on shareholder reporting the fund adopted a new broad-based securities market index, referred to as the Regulatory Benchmark.
- 3. The Russell $3000^{\$}$ Index is a broad-based index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents 98% of the investable US equity market.
- 4. The S&P Target Date[®] To 2050 Index is a benchmark for multi-class asset portfolios that corresponds to the target retirement date 2050.

Madison Target Retirement 2050 Fund Class I

What does the Fund invest in?

The Fund primarily invests in shares of other registered investment companies, following an asset allocation strategy for those planning to retire around 2050. As time progresses, the Fund's allocation will shift to a more conservative mix, aiming for about 10-30% in stock funds and 70-90% in bond funds.

Annual Shareholder Report December 31, 2024

Item 2. Code of Ethics.

- (a) The registrant has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party.
- (b) The code of ethics is filed as an exhibit to this Form N-CSR.
- (c) During the period covered by the report, registrant did not make any substantive amendments to the Code.
- (d) During the period covered by the report, registrant did not grant any waivers, including implicit waivers, from the provisions of the Code.
- (e) Any person may obtain a complete copy of the code without charge by calling the Adviser at 800-767-0300 and requesting a copy of "the Ultra Series Funds Sarbanes Oxley Code of Ethics."

Item 3. Audit Committee Financial Expert.

In August 2024, Scott Jones, Richard Struthers and Anita Zagrodnik, "independent" Trustees, and members of the Trust's audit committee, were appointed to serve as the Trust's audit committee financial experts among the four independent Trustees who qualifies to serve in that capacity.

Item 4. Principal Accountant Fees and Services.

- (a) <u>Audit Fees.</u> Total audit fees paid (or to be paid) to the registrant's principal accountant for the fiscal years ended December 31, 2024, and 2023, respectively were \$214,910 (\$458,910 including the Madison Funds, all affiliated investment companies "together, the "Affiliated Funds") and \$209,000 (\$465,450 including the Affiliated Funds).
- (b) <u>Audit-Related Fees.</u> For the fiscal years ended December 31, 2024 and December 31, 2023, the aggregate fees for professional services rendered by Deloitte & Touche for assurance and related services by such firm that were reasonably related to the performance of the audit of the registrant's annual financial statements other than those referenced in paragraph (a) above, totaled \$0 and \$0, respectively.
- (c) <u>Tax-Fees.</u> For the fiscal years ended December 31, 2024 and December 31, 2023, the aggregate fees paid (or to be paid) for professional services rendered by Deloitte & Touche for tax compliance, tax advice and tax planning are approximately \$50,636 (\$86,945 including the Affiliated Funds) and \$35,280 (\$104,969 including the Affiliated Funds), respectively.

In the scope of services comprising the fees disclosed under this Item 4(c) were the following services:

- Review and sign as signature preparer for U.S. Income Tax Return for Regulated Investment Companies, Form 1120-RIC, Return of Excise Tax on Undistributed Income of Regulated Investment Companies, Form 8613 and appropriate State tax returns.
- (d) All Other Fees. None.
- (a) (1) Before any accountant is engaged by the registrant to render audit or non-audit services, the engagement must be approved by the audit committee as contemplated by paragraph (c)(7)(i)(A) of Rule 2-01 of Regulation S-X.
- (e) (2) The Audit Committee has pre-approved, as required by Rule 2-01(c)(7)(i)(C) of Regulation S-X, 100% of the services described in this Item 4(b) through (d), which such services are described above.
- (f) All of the principal accountant's hours spent on auditing the registrant's financial statements were attributed to work performed by full-time permanent employees of the principal accountant.
- (g) None.

- (h) The audit committee of the board of trustees/directors has considered whether the provision of non-audit services that were rendered to the registrant's investment adviser is compatible with maintaining the principal accountant's independence and has concluded that the provision of such non-audit services by the accountant has not compromised the accountant's independence.
- (i) The registrant has not been identified by the U.S. Securities and Exchange Commission as having filed an annual report issued by a registered public accounting firm branch or office that is located in a foreign jurisdiction where the Public Company Accounting Oversight Board is unable to inspect or completely investigate because of a position taken by an authority in that jurisdiction.
- (j) The registrant is not a foreign issuer.

Item 5. Audit Committee of Listed Registrants.

- (a) Not applicable.
- (b) Not applicable.

Item 6. Schedule of Investments

- (a) Schedule of Investments is included as part of the Financial Statement and Financial Highlights for Open-End Management Investment Companies filed under Item 7 of this Form.
- (b) Not applicable.

Item 7. Financial Statements and Financial Highlights for Open-End Management Investment Companies.

- (a) The registrant's Financial Statements are attached herewith.
- (b) The registrant's Financial Highlights are attached herewith.

¹ Per share amounts have been calculated using the average shares method.

² These returns are after all charges at the mutual fund level have been subtracted. These returns are higher than the returns at the separate account level because charges made at the separate account level have not been subtracted.

³ Portfolio turnover is calculated at the fund level and represents the entire fiscal year.

¹ Per share amounts have been calculated using the average shares method.

These returns are after all charges at the mutual fund level have been subtracted. These returns are higher than the returns at the separate account level because charges made at the separate account level have not been subtracted.

Portfolio turnover is calculated at the fund level and represents the entire fiscal year.

Year Ended December 31,

¹ Per share amounts have been calculated using the average shares method.

² Amounts represent less than (0.005) per share.

These returns are after all charges at the mutual fund level have been subtracted. These returns are higher than the returns at the separate account level because charges made at the separate account level have not been subtracted.

⁴ Portfolio turnover is calculated at the fund level and represents the entire fiscal year.

¹ Per share amounts have been calculated using the average shares method.

These returns are after all charges at the mutual fund level have been subtracted. These returns are higher than the returns at the separate account level because charges made at the separate account level have not been subtracted.

Portfolio turnover is calculated at the fund level and represents the entire fiscal year.

Notes to Financial Statements

1. ORGANIZATION

The Ultra Series Fund (the "Trust"), a Massachusetts business trust, is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, open-end management investment company. The Trust is a series trust with 14 investment portfolios (individually, a "Fund," and collectively, the "Funds"), each with different investment objectives and policies. The Funds are the Core Bond Fund, High Income Fund, Large Cap Value Fund, Large Cap Growth Fund, Mid Cap Fund and International Stock Fund (collectively, the "Core Funds"), the Conservative Allocation Fund, Moderate Allocation Fund, Aggressive Allocation Fund and Diversified Income Fund (collectively, the "Target Allocation Funds") and the Madison Target Retirement 2020 Fund, Madison Target Retirement 2030 Fund, Madison Target Retirement 2040 Fund, and Madison Target Retirement 2050 Fund, (collectively, the "Target Date Funds"). Madison Asset Management, LLC (the "Investment Adviser" or "Madison") serves as the Funds' investment adviser.

The Declaration of Trust permits the Board of Trustees to issue an unlimited number of full and fractional shares of the Trust without par value. All Funds, except the Target Date Funds, offer Class I and II shares. The Target Date Funds only offer Class I shares. Each class of shares represents an interest in the assets of the respective Fund and has identical voting, dividend, liquidation and other rights, except that each class of shares bears its own distribution fee, if any, and its proportional share of Fund level expenses, and has exclusive voting rights on matters pertaining to Rule 12b-1 under the 1940 Act as it relates to that class and other class specific matters. Shares are offered to separate accounts (the "Accounts") of TruStage Financial Group, Inc. ("TruStage") and to qualified pension and retirement plans of TruStage. The Trust may, in the future, offer other share classes to separate accounts of insurance companies and to qualified pension and retirement plans that are not affiliated with TruStage. The Trust does not offer shares directly to the general public.

2. SIGNIFICANT ACCOUNTING POLICIES

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reported period. Actual results could differ from those estimates.

The Funds are investment companies that apply the accounting and reporting guidance in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, Financial Services-Investment Companies (ASC 946).

The following is a summary of significant accounting policies consistently followed by each Fund in the preparation of its financial statements.

Portfolio Valuation: Equity securities, including closed-end investment companies, American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") and Exchange-Traded Funds ("ETFs") listed on any U.S. or foreign stock exchange or quoted on the National Association of Securities Dealers Automated Quotation System ("NASDAQ") are valued at the last quoted sale price or official closing price on that exchange or NASDAQ on the valuation day (provided that, for securities traded on NASDAQ, the Funds utilize the NASDAQ Official Closing Price ("NOCP"). If no sale occurs, equities traded on a U.S. exchange, foreign exchange or on NASDAQ are valued at the bid price. Debt securities (other than short-term obligations) purchased with a remaining maturity of 61 days or more are valued on the basis of last available bid prices or current market quotations provided by dealers or pricing services approved by the Trust. In determining the value of a particular investment, pricing services approved by

Notes to Financial Statements - continued

the Trust may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments.

Municipal debt securities are traded via a network among dealers and brokers that connect buyers and sellers. They are valued on the basis of last available bid prices or current market quotations provided by dealers or pricing services approved by the Trust. There may be little trading in the secondary market for the particular bonds and other debt securities, making them more difficult to value or sell. Asset-backed and mortgage-backed securities are valued by independent pricing services using models that consider estimated cash flows of each tranche of the security, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche.

Investments in shares of open-end mutual funds, including money market funds, are valued at their daily net asset value ("NAV") which is calculated as of the close of regular trading on the New York Stock Exchange (the "NYSE") usually 4:00 p.m. Eastern Standard Time on each day on which the NYSE is open for business. NAV per share is determined by dividing each fund's total net assets by the number of shares of such fund outstanding at the time of calculation. Because the assets of each Allocation Fund and each Target Date Fund consist primarily of shares of other registered investment companies (the "Underlying Funds"), the NAV of each Fund is determined based on the NAVs of the Underlying Funds. Total net assets are determined by adding the total current value of portfolio securities, cash, receivables, and other assets and subtracting liabilities. Short-term instruments having maturities of 60 days or less are valued on an amortized cost basis, which approximates fair value.

Over-the-counter securities not listed or traded on NASDAQ are valued at the last sale price on the valuation day. If no sale occurs on the valuation day, an over-the-counter security is valued at the last bid price. Exchange-traded options are valued at the mean of the best bid and ask prices across all option exchanges. Over-the-counter options are valued based upon prices provided by market makers in such securities or dealers in such currencies. Financial futures contracts generally are valued at the settlement price established by the exchange(s) on which the contracts are primarily traded. Spot and forward foreign currency exchange contracts are valued based on quotations supplied by dealers in such contracts. Overnight repurchase agreements are valued at cost, and term repurchase agreements (i.e., those whose maturity exceeds seven days), swaps, caps, collars and floors, if any, are valued at the average of the closing bids obtained daily from at least one dealer.

Through the end of this reporting period, the value of all assets and liabilities expressed in foreign currencies was converted into U.S. dollar values using the then-current exchange rate at the close of regular trading on the NYSE.

All other securities for which either quotations are not readily available, no other sales have occurred, or in the Investment Adviser's opinion, do not reflect the current fair value, are appraised at their fair values as determined in good faith by the Investment Adviser's Pricing Committee (the "Committee") and under the general supervision of the Board of Trustees. When fair value pricing of securities is employed, the prices of securities used by the Funds to calculate NAV may differ from market quotations or NOCP. Because the Target Allocation Funds and Target Date Funds primarily invest in Underlying Funds, government securities and short-term paper, it is not anticipated that the Investment Adviser will need to "fair value" any of the investments of these Funds. However, an Underlying Fund may need to "fair value" one or more of its investments, which may, in turn, require a Target Allocation Fund or Target Date Fund to do the same because of delays in obtaining the Underlying Fund's NAV.

Rule 2a-5 under the 1940 Act (the "Valuation Rule") establishes requirements for determining fair value in good faith, including related oversight and reporting requirements. The Valuation Rule also defines when market quotations are "readily available," which is the threshold for determining whether a fund must fair value a security. Among other things, the Valuation Rule permits a board of trustees of a fund to designate a fund's investment adviser as valuation designee to perform a fund's fair value determinations subject to board oversight and certain reporting and other requirements intended to ensure that the board receives the information it needs to oversee a fund's investment adviser fair value determinations. The Board has designated the Funds' Investment Adviser as Valuation Designee and the Valuation Designee has delegated valuation decisions to the Committee.

A Fund's investments will be valued at fair value if, in the judgment of the Committee, an event impacting the value of an investment occurred between the closing time of a security's primary market or exchange (for example, a foreign exchange or market) and the time the Fund's share price is calculated as of the close of regular trading on the NYSE. Significant events may include, but are not limited to, the following: (1) significant fluctuations in domestic markets, foreign markets or foreign currencies; (2) occurrences not directly tied to the securities markets such as natural disasters, armed conflicts or significant government actions; and (3) major announcements affecting a single issuer or an entire market or market sector. Fixed income securities either newly issued or not being priced for various reasons by one of our approved pricing sources may also be fair valued. In responding to a significant event, the Committee would determine the fair value of affected securities considering factors including, but not limited to: fundamental analytical data relating to the investment; the nature and duration of any restrictions on the disposition of the investment; and the forces influencing the market(s) in which the investment is purchased or sold. In addition to the fair value decisions made by the Committee noted above, the Committee also engages an independent fair valuation service to adjust the valuations of foreign equity securities based on specific market-movement parameters established by the Committee and approved by the Board of Trustees. Such adjustments to the valuation of foreign securities are applied automatically upon market close if the parameters established are exceeded. A foreign security is also automatically fair valued if the exchange it is traded on is on holiday.

Segment Reporting: During the reporting period, the Funds adopted FASB Accounting Standards Update 2023-07, Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures ("ASU 2023-07"). Adoption of the new standard impacted financial statement disclosures only and did not affect the Fund's financial position or the results of its operations. An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed by the public entity's chief operating decision maker (CODM) to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. The Management Committee of the Trust's Investment Adviser acts as the CODM. Each Fund within the Trust represents a single operating segment, as the CODM monitors the operating results of each Fund as a whole and the Fund's long-term strategic asset allocation is pre-determined in accordance with the terms of its prospectus, based on a defined investment strategy which is executed by the Fund's portfolio managers as a team. The financial information in the form of a Fund's total returns, expense ratios, changes in net assets resulting from operations, subscriptions and redemptions and profitability to the Investment Adviser, which are used by the CODM to assess the segment's performance versus the Fund's comparative benchmarks and peers to make resource allocation decisions for the Fund's single segment, is consistent with that presented within the Fund's financial statements. Segment assets are reflected on the accompanying statement of assets and liabilities as "total assets" and significant segment expenses are listed on the accompanying statement of operations.

Security Transactions and Investment Income: Security transactions are accounted for on a trade date basis. Net realized gains or losses on sales are determined by the identified cost method. Net realized gain on investments in the Statements of Operations also includes realized gain distributions received from the underlying exchange-listed funds. Distributions of net realized gains are recorded on the Fund's ex-distribution date. Dividend income is recorded on ex-dividend date, except that certain dividends from foreign securities may be recorded after the ex-dividend date based on when the Funds are informed of the dividend. Interest income is recorded on an accrual basis and is increased by the accretion of discount and decreased by the amortization of premium. Amortization and accretion are recorded on the effective yield method.

Expenses: Expenses that are directly related to one Fund are charged directly to that Fund. Other operating expenses are prorated to the Funds on the basis of relative net assets. Class-specific expenses are borne by that class.

Classes: Income and realized and unrealized gains/losses are allocated to the respective classes on the basis of relative net assets.

Repurchase Agreements: Each Fund may engage in repurchase agreements. In a repurchase agreement, a security is purchased for a relatively short period (usually not more than seven days) subject to the obligation to sell it back to the issuer at a fixed time and price plus accrued interest. The Funds will enter into repurchase agreements only with members of the Federal Reserve System, U.S. Central Credit Union and with "primary dealers" in U.S. government securities.

The Trust has established a procedure providing that the securities serving as collateral for each repurchase agreement must be delivered to the Trust's custodian either physically or in book-entry form and that the collateral must be marked to market daily to ensure that each repurchase agreement is fully collateralized at all times. In the event of bankruptcy or other default by a seller of a repurchase agreement, a Fund could experience one of the following: delays in liquidating the underlying securities during the period in which the Fund seeks to enforce its rights thereto, possible decreased levels of income, declines in value of the underlying securities, or lack of access to income during this period and the expense of enforcing its rights. As of December 31, 2024, none of the Funds held open repurchase agreements.

Foreign Currency Transactions: The Trust's books and records are maintained in U.S. dollars. Foreign currency-denominated transactions (i.e., investment securities, assets and liabilities, purchases and sales of investment securities, and income and expenses) are translated into U.S. dollars at the current rate of exchange. The Funds enter into contracts on the trade date to settle any securities transactions denominated in foreign currencies on behalf of the Funds at the spot rate at settlement.

Each Fund may invest in foreign currency transactions. Such funds report certain foreign currency-related transactions as components of realized gains or losses for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes. Realized gains or losses associated with currency transactions are included in the Statements of Operations under the heading "Net realized gain (loss) on investments." For the year ended, December 31, 2024, International Stock Fund had net realized losses of \$(566) related to foreign currency transactions. As of December 31, 2024, none of the Funds had open foreign currency transactions.

The Funds do not isolate the portion of gains and losses on investments in securities that is due to changes in the foreign exchange rates from that which is due to change in market prices of securities. Such amounts are categorized as gain or loss on investments for financial reporting purposes.

Forward Foreign Currency Exchange Contracts: Each Fund may purchase and sell forward foreign currency exchange contracts for defensive or hedging purposes. When entering into forward foreign currency exchange contracts, the Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed-upon price on an

agreed future date. These contracts are valued daily. The Funds' net assets reflect unrealized gains or losses on the contracts as measured by the difference between the forward foreign currency exchange rates at the dates of entry into the contracts and the forward rates at the reporting date. The Funds realize a gain or a loss at the time the forward foreign currency exchange contracts are settled or closed out with an offsetting contract. Contracts are traded over-the-counter directly with a counterparty. Realized and unrealized gains and losses are included in the Statements of Operations. As of December 31, 2024, none of the Funds had open forward foreign currency exchange contracts.

If a Fund enters into a forward foreign currency exchange contract to buy foreign currency for any purpose, the Fund will be required to place cash or other liquid assets in a segregated account with the Fund's custodian in an amount equal to the value of the Fund's total assets committed to the consummation of the forward contract. If the value of the securities in the segregated account declines, additional cash or securities will be placed in the segregated account so that the value of the account will equal the amount of the Fund's commitment with respect to the contract.

Cash Concentration: At times, the Funds maintain cash balances at financial institutions in excess of federally insured limits. The Funds monitor this credit risk and have not experienced any losses related to this risk.

Illiquid Securities: Each Fund currently limits investments in illiquid investments, as defined by Rule 22e-4 under the 1940 Act, to 15% of net assets at the time of purchase. An illiquid investment is generally defined as a security that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security. At December 31, 2024, there were no illiquid securities held in the Funds.

Delayed Delivery Securities: Each Fund may purchase securities on a when-issued or delayed delivery basis. "When-issued" refers to securities whose terms are available and for which a market exists, but that have not been issued. For when-issued or delayed delivery transactions, no payment is made until delivery date, which is typically longer than the normal course of settlement. When a Fund enters into an agreement to purchase securities on a when-issued or delayed delivery basis, the Fund may segregate cash or other liquid securities, of any type or maturity, equal in value to the Fund's commitment. Losses may arise due to changes in the fair value of the underlying securities, if the counterparty does not perform under the contract, or if the issuer does not issue the securities due to political, economic or other factors. As of December 31, 2024, none of the Funds had entered into such transactions.

Indemnifications: Under the Funds' organizational documents, the Funds' officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In the normal course of business, the Funds enter into contracts that contain a variety of representations and provide general indemnifications. The Funds' maximum liability exposure under these arrangements is unknown, as future claims that have not yet occurred may be made against the Funds. However, based on experience, management expects the risk of loss to be remote.

3. FAIR VALUE MEASUREMENTS

Each Fund has adopted FASB guidance on fair value measurements. Fair value is defined as the price that each Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. A three-tier hierarchy is used to maximize the use of observable market data "inputs" and minimize the use of unobservable "inputs" and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk (for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs used in the valuation technique). Inputs may be observable or unobservable.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below:

Level 1 - unadjusted quoted prices in active markets for identical investments

Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rate volatilities, prepayment speeds, credit risk, benchmark yields, transactions, bids, offers, new issues, spreads, and other relationships observed in the markets among comparable securities, underlying equity of the issuer; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance, and other reference data, etc.)

Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Funds to measure fair value for the year ended December 31, 2024 maximized the use of observable inputs and minimized the use of unobservable inputs. The Funds utilized the following fair value techniques: multi-dimensional relational pricing model and option adjusted spread pricing; the Funds estimated the price that would have prevailed in a liquid market for an international equity security given information available at the time of valuation. As of December 31, 2024, none of the Funds held securities deemed as a Level 3, and there were no transfers between classification levels.

The following is a summary of the inputs used as of December 31, 2024, in valuing the Funds' investments carried at fair value:

Fund ¹		Level 1	Level 2	Level 3	Value at 12/31/24

4. ADVISORY, DISTRIBUTION, ADMINISTRATIVE SERVICES AGREEMENTS AND OTHER EXPENSES

Investment Advisory Agreements: For its investment advisory services to the Funds, the Investment Adviser is entitled to receive a fee, which is computed daily and paid monthly, at an annualized percentage rate of the average daily value of the net assets of each Fund as follows as of December 31, 2024:

Fund	Advisory Fee Fund		Advisory Fee
Conservative Allocation	0.30%	Large Cap Growth	0.80%
Moderate Allocation	0.30%	Mid Cap	0.90%
Aggressive Allocation	0.30%	International Stock	1.15%
Diversified Income	0.25%	Madison Target Retirement 2020	0.25%
Core Bond	0.55%	Madison Target Retirement 2030	0.25%
High Income	0.75%	Madison Target Retirement 2040	0.25%
Large Cap Value	0.60%	Madison Target Retirement 2050	0.25%

The Investment Advisory Agreement for the Core Funds and the Allocation Funds is structured as a "unitary fee arrangement" and, as such, requires the Investment Advisor to provide or arrange to provide overall management of the Funds, including but not limited to, investment management services, custody, transfer agency, dividend disbursing, legal, accounting and administrative services. The unitary fee arrangement with these Funds does not cover, and therefore these Funds pay directly for, the following fees and expenses: (i) fees and expenses of the Independent Trustees; (ii) fees and expenses of the Trust's independent registered public accountant; (iii) brokerage commissions and other expenses incurred in the acquisition or disposition of any securities or other investments; (iv) costs of borrowing money, overdrafts (if any) and any potential taxes owed; and (v) extraordinary expenses (including litigation and/or and consulting expenses) as approved by a majority of the Independent Trustees, (these expenses are collectively referred to as "Direct Fund Expenses").

In contrast, the Investment Advisory Agreement for the Target Date Funds is not structured as a "unitary fee arrangement." Accordingly, under the Investment Advisory Agreement for these Funds, the Investment Adviser is only responsible for providing investment management services to the Funds. Other services performed by the Investment Adviser for the Target Date Funds are covered under a separate Administrative Services Agreement (discussed below).

Under the Investment Advisory Agreements for the Core Funds, the Allocation Funds, and the Target Date Funds, the Investment Adviser may from time to time, contractually or voluntarily, agree to waive a portion of its management fee and/or reimburse a Fund's operating expenses to ensure that the Fund's operating expenses do not exceed certain expense limitations. Any fees waived or reimbursed are not subject to later recoupment by the Investment Adviser. The Investment Adviser may also permanently reduce the amount of the management fee for one or more Funds under such terms as it may determine by written notice thereof to the Trust.

In connection with the most recent approval by the Board of Trustees of the Investment Advisory Agreements, the Investment Adviser contractually agreed to enter into an Operating Expense Limitation Agreement with the

Trust, on behalf of the Funds, under which the Investment Adviser agreed to waive its management fees and/ or reimburse expenses of each Fund to the extent necessary to limit each class of each Fund's total operating expenses (excluding certain expenses described below) to the annual rate set forth in the Funds' then-currently effective prospectus (i.e., the prospectus dated May 1, 2024, as supplemented). The Operating Expense Limitation Agreement became effective for all Funds on December 1, 2023, and will remain in place until at least November 30, 2025. For the year ended December 31, 2024, the Investment Adviser did not waive any of its management fees and/or reimburse Fund expenses because all Funds operated under the fee cap during the period. Expenses excluded from the fee cap in the Operating Expense Limitation Agreement are as follows:

<u>Core Funds and Allocation Funds:</u> Excluded expenses are those expenses assumed by the Funds as provided in Section 4(b) of the relevant Investment Advisory Agreement. Such expenses consist of those expenses identified as "Direct Fund Expenses," above.

<u>Target Date Funds:</u> Excluded expenses consist of the following: any front-end or contingent deferred loads, taxes, leverage/borrowing interest, interest expense, dividends paid on short sales, brokerage commissions, acquired fund fees and expenses, extraordinary expenses such as litigation, and other "Excluded Expenses" (as defined in the Administrative Services Agreement, described below).

Administrative Services Agreement - Target Date Funds: With respect to the Target Date Funds only, in addition to the advisory fee, the Investment Adviser is entitled to receive an administrative services fee pursuant to the terms of a separate Administrative Services Agreement. Under this agreement, the Investment Adviser has agreed to provide or arrange to have a third party provide the Target Date Funds with such services as they may require in the conduct of their business, to the extent that the Investment Adviser, acting as the Funds' investment adviser, has not undertaken to provide such services. Services to the Target Date Funds under the Administrative Services Agreement include transfer agent services; fund administrator services; fund accountant services; services of the Trust's independent public accountants; services of legal counsel to the Trust and the Independent Trustees; and such other services necessary to conduct the Funds' business. In exchange for these services, each Target Date Fund pays the Investment Adviser a fee, which is computed daily and paid monthly, at an annualized rate of 0.05% the average daily value of the net assets of each Target Date Fund. Not included in this fee and, therefore, the responsibility of the Target Date Funds, are the following fees and expenses: (i) any fees and expenses relating to portfolio holdings (e.g., brokerage commissions, interest on loans, etc.); (ii) extraordinary and non-recurring fees and expenses (e.g., costs relating to overdrafts of any line of credit maintained with its custodian or another entity for investment purposes); (iii) the costs associated with investment by the Target Date Funds in other investment companies (i.e., acquired fund fees); and (iv) the compensation of Trust's Independent Trustees (these expenses are collectively referred to as "Excluded Expenses").

Other Expenses: Due to the "unitary fee arrangement" in place with respect to the Core Funds and the Allocation Funds, and the Administrative Services Agreement arrangement in place with respect to the Target Date Funds, the Core Funds and the Allocation Funds are directly responsible for certain fees and expenses that differ somewhat from the fees and expenses for which the Target Date Funds are directly responsible.

Distribution Agreement: MFD Distributor, LLC ("MFD") serves as distributor of the Funds. The Trust adopted a distribution and service plan with respect to the Trust's Class II shares pursuant to Rule 12b-1 under the 1940 Act. Under the plan, the Trust will pay a service fee with regard to Class II shares at an annual rate of 0.25% each Fund's daily net assets.

MFD may from time to time voluntarily agree to waive a portion of its fees or expenses related to the Funds. For the year ended December 31, 2024, no fees were waived. MFD does not have the right to recoup waived fees.

Officers and Trustees: Certain officers and Trustees of the Trust may also be officers, directors and/or employees of the Adviser or its affiliates. The Trust does not compensate its officers or Trustees who are officers, directors and/or employees of the Adviser or its affiliates. The Independent Trustees fees are a direct expense of the Funds which is included in the "Trustee fees" line item on the Statements of Operations. The Nominating and Governance Committee of the Board reviews fees paid to Independent Trustees periodically, and may change such fees at any time.

5. DIVIDENDS FROM NET INCOME AND DISTRIBUTIONS OF CAPITAL GAINS

The Funds declare dividends from net investment income and net realized gains from investment transactions, if any, annually, which are reinvested in additional full and fractional shares of the respective Funds.

Income and capital gain distributions, if any, are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States of America. Taxable distributions from income and realized capital gains of the Funds may differ from book amounts earned during the period due to differences in the timing of capital gains recognition, and due to the reclassification of certain gains or losses from capital to income. Dividends from net investment income are determined on a class level. Capital gains are determined on a Fund level.

6. SECURITIES TRANSACTIONS

For the year ended December 31, 2024, aggregate cost of purchases and proceeds from sales of securities, other than short-term investment, were as follows:

	U.S. Govern	ment So		ecurities				
Fund	Purchases	Purchases Sales			Purchases	Sales		
Conservative Allocation	\$ -	\$		\$	31,857,328	\$	87,961,556

High Income	_		_		801,178		2,064,260	
Large Cap Value	_		_		36,627,835		56,227,788	
Large Cap Growth	_		_		18,418,567		46,791,982	
Mid Cap	_		=		20,897,516		46,180,329	
International Stock	_		_		4,310,450		7,116,342	
Madison Target Retirement 2020	_		=		5,547,234		7,178,346	
Madison Target Retirement 2030	_		_		20,109,777		26,716,246	
Madison Target Retirement 2040	_		_		17,592,013		16,894,424	
Madison Target Retirement 2050	-		_		12,955,603		12,539,355	

7. FOREIGN SECURITIES

Each Fund may invest in foreign securities. Foreign securities are defined as securities that are: (i) issued by companies organized outside the U.S. or whose principal operations are outside the U.S., or issued by foreign governments or their agencies or instrumentalities ("foreign issuers"); (ii) principally traded outside of the U.S.; and/or (iii) quoted or denominated in a foreign currency ("non-dollar securities"). Foreign securities include American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs"), Swedish Depositary Receipts ("SDRs") and foreign money market securities. U.S. dollar-denominated securities that are part of the Merrill Lynch U.S. Domestic Master Index are not considered a foreign security.

8. SECURITIES LENDING

The Board of Trustees has authorized the Funds, other than the Target Date Funds, to engage in securities lending with State Street Bank and Trust Company as securities lending agent pursuant to a Securities Lending Authorization Agreement (the "Agreement") and subject to the Trust's securities lending policies and procedures. Under the terms of the Agreement, and subject to the policies and procedures, the authorized Funds may lend portfolio securities to qualified borrowers in order to generate additional income, while managing risk associated with the securities lending program. The Agreement requires that loans are collateralized at all times by cash or U.S. government securities, initially equal to at least 102% of the value of domestic securities and 105% of non-domestic securities, based upon the prior days market value for securities loaned. The loaned securities and collateral are marked to market daily to maintain collateral at 102% and 105% for non-domestic security of the total loaned portfolio for each broker/borrower. Amounts earned as interest on investments of cash collateral, net of rebates and fees, if any, are included in the Statements of Operations. The primary risk associated with securities lending is loss associated with investment of cash and non-cash collateral. A secondary risk is if the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons. The Funds could experience delays and costs in recovering securities loaned or in gaining access to the collateral. Under the Agreement, the securities lending agent has provided a limited indemnification in the event of a borrower default. The Funds do not have a master netting agreement.

As of December 31, 2024, the aggregate fair value of securities on loan for the Trust was \$30,537,910. Cash collateral received for such loans is reinvested into the State Street Navigator Securities Lending Government Money Market Portfolio. Non-cash collateral is comprised of U.S. treasuries or other U.S. government securities. See below for fair value on loan and collateral breakout for each Fund and each respective Fund's portfolio of investments for individual securities identified on loan.

Fund	Fair Value on Loan			ı Collateral*	Non-Cash Collateral*		
Conservative Allocation	\$	2,169,672	\$	1,089,902	\$	1,124,447

^{*} Collateral represents minimum 102% of the value of domestic securities and 105% of non-domestic securities on loan, based upon the prior days market value for securities loaned.

The following table provides increased transparency about the types of collateral pledged for securities lending transactions that are accounted for as secured borrowing. Non-cash collateral is not reflected in the table because the Funds cannot repledge or resell this collateral.

⁽¹⁾ Amounts represent the payable for cash collateral received on securities on loan. This will generally be in the "Overnight and Continuous" column as the securities are typically callable on demand. The payable will be allocated into categories of securities based on the market value of the securities on loan.

9. FEDERAL INCOME TAX INFORMATION

It is each Fund's policy to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute all its taxable income to its shareholders and any net realized capital gains at least annually. Accordingly, no provisions for federal income taxes are recorded in the accompanying statements.

The Funds have not recorded any liabilities for material unrecognized tax benefits as of December 31, 2024. It is each Fund's policy to recognize accrued interest and penalties related to uncertain tax benefits in income taxes, as appropriate. Tax years that remain open to examination by major tax jurisdictions include tax years ended December 31, 2021 through December 31, 2024.

The tax character of distributions paid during the years ended December 31, 2024 and 2023 were as follows:

	Ordinar	y In	come	Long-Term Capital Gain			n Return of Cap			pital
Fund	 2024		2023	 2024		2023		2024		2023

As of December 31, 2024, the components of distributable earnings on a tax basis were as follows:

Fund	Ordinary Income			
Conservative Allocation*	\$ 206,974	<u>\$</u>		
Moderate Allocation	298,602	1,205,561		
Aggressive Allocation*	97,765	587,020		
Diversified Income*	1,856,170	135,631		
Core Bond*	229,649	_		
High Income	49,404	_		
Large Cap Value*	412,478	434,476		
Large Cap Growth*	136,620	1,563,373		
Mid Cap	167,067	6,474,413		
International Stock*	9,551	_		
Madison Target Retirement 2020	49,790	_		
Madison Target Retirement 2030	168,970	_		
Madison Target Retirement 2040*	120,796	_		
Madison Target Retirement 2050	102,816	_		

^{*} The difference between the accumulated distributable earning on the Statement of Asset and Liability and the components of distributable earnings on a tax basis is due to other temporary differences not included on this table.

For federal income tax purposes, the Funds listed below have capital loss carryforwards as of December 31, 2024, which are available to offset future capital gains, if any, realized through the fiscal year listed:

	No Ex	piratio	n Date		
Fund	Short-Term		Long-Term		
Conservative Allocation	\$ 4,005,5	44 \$	1,770,530		
Core Bond	367,9	55	5,355,172		
High Income	476,3	13	2,610,627		
International Stock	179,5	44	1,805,176		
Madison Target Retirement 2020	2,176,4	98	820,842		
Madison Target Retirement 2030	2,678,3	55	1,125,439		
Madison Target Retirement 2040	1,390,8	52	302,228		
Madison Target Retirement 2050	1,131,9	50	274,974		

For the year-ended December 31, 2024, capital losses utilized for each Fund were as follows:

Fund	Amc	ount Utilized
Conservative Allocation	\$	1,370,265
Moderate Allocation		2,311,094
Aggressive Allocation		268,079
International Stock		79,750
Madison Target Retirement 2030		235,797
Madison Target Retirement 2040		504,548
Madison Target Retirement 2050		354,040

At December 31, 2024, the aggregate gross unrealized appreciation (depreciation) and net unrealized appreciation (depreciation) for all securities as computed on a federal income tax basis for each Fund were as follows:

Fund	Appreciation	D	epreciation	Net
Conservative Allocation	\$ 2,622,47	2 \$	(2,655,004)	\$ (32,532)
Moderate Allocation	12,196,54	4	(3,877,982)	8,318,562
Aggressive Allocation	5,664,57	2	(1,006,799)	4,657,773
Diversified Income	2,802,32	5	(2,288,154)	514,172
Core Bond	269,48	3	(5,610,542)	(5,341,054)
High Income	25,40	1	(519,600)	(494,199)
Large Cap Value	40,380,45	7	(4,215,546)	36,164,911
Large Cap Growth	101,045,79	5	(3,599,829)	97,445,967
Mid Cap	73,294,00	1	(2,375,027)	70,918,974
International Stock	2,717,17	9	(2,907,570)	(190,391)
Madison Target Retirement 2020	421,34	C	(286,553)	134,787
Madison Target Retirement 2030	3,486,11	5	(1,153,822)	2,332,294
Madison Target Retirement 2040	3,459,84	7	(755,819)	2,704,028
Madison Target Retirement 2050	3,639,32	3	(624,808)	3,014,520

The differences between cost amounts for book purposes and tax purposes are primarily due to the tax deferral of wash sales.

Reclassification Adjustments: Paid-in capital, undistributed net investment income, and accumulated net realized gain (loss) have been adjusted in the Statements of Assets and Liabilities for permanent book-tax differences for all Funds.

Differences primarily relate to the tax treatment of net operating losses, paydown gains and losses, foreign currency gains and losses, return of capital and other distributions from real estate investment trusts and non-REIT, securities adjustments related to Treasury Inflation Protected securities (TIPS), distribution re-designations from investments in other regulated investment companies and unusable capital carry loss carryforwards.

To the extent these book and tax differences are permanent in nature, such amounts are reclassified at the end of the fiscal year among paid-in capital in excess of par value, accumulated undistributed net investment income (loss) and accumulated net realized gain (loss) on investments and foreign currency translations. Accordingly, at December 31, 2024, reclassifications were recorded as follows:

		Undistributed Net	Accumulated Net	
Fund	Paid-in Capital	Investment Income (Loss)	Realized Gain (Loss)	
Conservative Allocation	\$ -	\$ 3,954	\$ (3,954)	
Moderate Allocation	_	14,466	(14,466)

10. CAPITAL SHARES AND AFFILIATED OWNERSHIP

All capital shares outstanding at December 31, 2024, are owned by separate investment accounts and/or pension plans of TruStage.

The Allocation Funds invest in Underlying Funds, including the Madison Funds (the "Affiliated Underlying Funds"), which may be deemed to be under common control because of the same investment adviser and membership in a common family of investment companies Madison Funds' historical financial information is available to you at no cost on the SEC's website at www.sec.gov, by calling 1-800-877-6089 or by visiting the Madison Funds' website at www.madisonfunds.com. A summary of the transactions with each Affiliated Underlying Fund during the year ended December 31, 2024 follows:

¹ Distributions received include distributions from capital gains from the Underlying Funds.

11. CERTAIN RISKS

Investing in certain financial instruments, including forward foreign currency contracts, involves certain risks. Risks associated with these instruments include potential for an illiquid secondary market for the instruments or inability of counterparties to perform under the terms of the contracts, changes in the value of foreign currency relative to the U.S. dollar and volatility resulting from an imperfect correlation between the movements in the prices of the instruments and the prices of the underlying securities and interest rates being hedged. The International Stock Fund may enter into these contracts primarily to protect the Fund from adverse currency movements.

Investing in foreign securities involves certain risks not necessarily found in U.S. markets. These include risks associated with adverse changes in economic, political, regulatory and other conditions, changes in currency exchange rates, exchange control regulations, expropriation of assets or nationalization, imposition of withholding

taxes on dividend or interest payments or capital gains, and possible difficulty in obtaining and enforcing judgments against foreign entities. Further, issuers of foreign securities are subject to different, and often less comprehensive, accounting, reporting and disclosure requirements than domestic issuers.

The Core Bond Fund is subject to derivatives risk, which is the risk that loss may result from investments in options, forwards, futures, swaps and other derivatives instruments. These instruments may be illiquid, difficult to price and leveraged so that small changes in the value of the underlying instruments may produce disproportionate losses to the Fund. Derivatives are also subject to counterparty risk, which is the risk that the other party to the transaction will not fulfill its contractual obligations.

The High Income Fund invests in securities offering high current income which generally will include bonds in the below investment grade categories of recognized rating agencies (so-called "junk bonds"). These securities generally involve more credit risk than securities in the higher rating categories. In addition, the trading market for high yield securities may be relatively less liquid than the market for higher-rated securities. The Fund generally invests at least 80% of its net assets in high yield securities.

The Target Allocation Funds and Target Date Funds are fund of funds, meaning that each invests primarily in Underlying Funds, including ETFs. Thus, each Fund's investment performance and its ability to achieve its investment goal are directly related to the performance of the Underlying Funds in which it invests; and the Underlying Fund's performance, in turn, depends on the particular securities in which that Underlying Fund invests and the expenses of that fund. Accordingly, these Funds are subject to the risks of the Underlying Funds in direct proportion to the allocation of their respective assets among the Underlying Funds. Additionally, the Target Allocation Funds and Target Date Funds are subject to asset allocation risk and manager risk. Manager risk (i.e., fund selection risk) is the risk that the Underlying Fund(s) selected to fulfill a particular asset class underperforms their peers. Asset allocation risk is the risk that the allocation of the Fund's assets among the various asset classes and market segments will cause the Fund to underperform other Funds with a similar investment objective.

The Funds may be subject to interest rate risk which is the risk that the value of your investment will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the fair value of income-bearing securities. When interest rates rise, bond prices fall; generally the longer a bond's maturity, the more sensitive it is to risk. Federal Reserve policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of a fund's investments and share price to decline. The Core Bond Fund may invest in derivatives tied to fixed-income markets and may be more substantially exposed to these risks than a fund that does not invest in derivatives.

The Funds are also subject to cybersecurity risk, which include the risks associated with computer systems, networks and devices to carry out routine business operations. These systems, networks and devices employ a variety of protections that are designed to prevent cyberattacks. Despite the various cyber protections utilized by the Funds, the Investment Adviser, and other service providers, their systems, networks, or devices could potentially be breached. The Funds, their shareholders, and the Investment Adviser could be negatively impacted as a result of a cybersecurity breach. Although the Funds monitor this risk closely, the Funds cannot control the cybersecurity plans and systems put in place by service providers or any other third parties whose operations may affect the Funds.

U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent months and years due to a number of economic, political and global macro factors including uncertainty regarding inflation and interest rate levels, the possibility of a national or global recession,

trade tensions, political events, and the wars in Europe and in the Middle East. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions. Continuing market volatility as a result of recent market conditions or other events may have adverse effects on the value of the Fund's portfolio holdings.

In addition to the other risks described above and in the Prospectus, you should understand what we refer to as "unknown market risks." While investments in securities have been keystones in wealth building and management, at times these investments have produced surprises. Those who enjoyed growth and income of their investments generally were rewarded for the risks they took by investing in the markets. Although the Investment Adviser seeks to appropriately address and manage the risks identified and disclosed to you in connection with the management of the securities in the Funds, you should understand that the very nature of the securities markets includes the possibility that there may be additional risks of which we are not aware. We certainly seek to identify all applicable risks and then appropriately address them, take appropriate action to reasonably manage them and to make you aware of them so you can determine if they exceed your risk tolerance. Nevertheless, the often volatile nature of the securities markets and the global economy in which we work suggests that the risk of the unknown is something to consider in connection with an investment in securities. Unforeseen events could under certain circumstances produce a material loss of the value of some or all of the securities we manage for you in the Funds.

12. SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Funds through the date the financial statements were available for issue. Effective on or about April 30th, 2025, after market close, the Ultra Series High Income Fund and Ultra Series International Stock Fund will be liquidated.

No other events have taken place that meet the definition of a subsequent event that require adjustment to, or disclosure in the financial statements.

To the shareholders and the Board of Trustees of Ultra Series Fund:

Opinion on the Financial Statements and Financial Highlights

We have audited the accompanying statements of assets and liabilities of Ultra Series Fund (the "Funds"), comprising the Conservative Allocation Fund, Moderate Allocation Fund, Aggressive Allocation Fund, Diversified Income Fund, Core Bond Fund, High Income Fund, Large Cap Value Fund, Large Cap Growth Fund, Mid Cap Fund, International Stock Fund, Madison Target Retirement 2020 Fund, Madison Target Retirement 2030 Fund, Madison Target Retirement 2040 Fund, and Madison Target Retirement 2050 Fund, including the portfolios of investments as of December 31, 2024, the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights present fairly, in all material respects, the financial position of each of the funds constituting the Ultra Series Fund as of December 31, 2024, and the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. Our procedures included confirmation of securities owned as of December 31, 2024, by correspondence with the custodian, transfer agents, and brokers. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP

Chicago, Illinois February 27, 2025

We have served as the auditor of one or more Madison Investment Advisors investment companies since 2009.

Other Information (Unaudited)

AVAILABILITY OF QUARTERLY PORTFOLIO SCHEDULES

The Trust files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-PORT-EX. Form N-PORT-EX is available to shareholders upon request at no cost by calling 1-800-877-6089 or on the SEC's website at www.sec.gov. Form N-PORT-EX may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. More information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

PROXY VOTING POLICIES, PROCEDURES AND RECORDS

A description of the policies and procedures used by the Trust to vote proxies related to portfolio securities is available to shareholders, upon request, at no cost by calling 1-800-877-6089, or on the SEC's website at www.sec. gov and is also located in the Funds' Statement of Additional Information. The proxy voting records for the Trust for the most recent twelve-month period ended June 30 is available to shareholders, upon request, at no cost by calling 1-800-SEC-0330, or on the SEC's website at www.sec.gov.

TAX INFORMATION

Foreign Tax Credits: The Funds expect to make an election under Internal Revenue Code Section 853 to pass through foreign taxes paid by the Funds to their shareholders. For the year ended 2024, the following Funds intend to pass through foreign tax credits and have derived gross income from foreign countries amounting to:

Fund	Foreign T	Tax Credit Pass-Through	Fore	eign Source Income
International Stock	- \$	33,000	\$	365,919

Complete information regarding the Funds' foreign tax credit pass through to shareholders for the year ended December 31, 2024, will be reported in conjunction with Form 1099-DIV.

Corporate Dividends Received Deduction: For the taxable year ended 2024, the following percentage of income dividends paid by the Funds qualify for the dividends received deduction available to corporations:

Fund	Percentage
Conservative Allocation	5.77%
Moderate Allocation	12.29%
Aggressive Allocation	17.84%
Diversified Income	4.90%
Core Bond	_
High Income	_
Large Cap Value	100.00%
Large Cap Growth	49.81%
Mid Cap	100.00%
International Stock	_
Madison Target Retirement 2020	0.14%
Madison Target Retirement 2030	4.66%
Madison Target Retirement 2040	8.05%
Madison Target Retirement 2050	10.91%

Qualified Dividend Income: For the taxable year ended 2024, the Funds hereby designate the maximum amount of dividends allowable pursuant to the Internal Revenue Code, as qualified dividend income ("QDI") eligible for reduced tax rates (the rates range from 5% to 15% depending upon individual's tax bracket). Complete information regarding each Fund's income distributions paid during the calendar year 2024, including the portion, if any, which qualify as QDI, will be reported in conjunction with Form 1099-DIV.

Item 8. Changes in and Disagreements with Accountants for Open-End Management Investment Companies.

The registrant has had no changes in or disagreements with accountants and on accounting and financial disclosure required by Item 304 of Regulation S-K [17 CFR 229.304].

Item 9. Proxy Disclosures for Open-End Management Investment Companies.

The Trust had no matters submitted during the period covered by the report to a vote of shareholders of an open-end management investment company registered on Form N-1A [17 CFR 239.15A and 17 CFR 274.11A.

Item 10. Remuneration Paid to Directors, Officers, and Others of Open-End Management Investment Companies.

The registrant discloses remuneration paid to directors, officers, and others as part of the financial statements included in item 7 of this Form.

Item 11. Statement Regarding Basis for Approval of Investment Advisory Contract.

There were no investment advisory contracts for the registrant's board of directors to approve during the Fund's most recent fiscal half-year.

Item 12. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

Not applicable.

Item 13. Portfolio Managers of Closed-End Management Investment Companies.

Not applicable.

Item 14. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

Not applicable.

Item 15. Submission of Matters to a Vote of Security Holders.

The registrant does not normally hold shareholder meetings. There have been no changes to the registrant's procedures during the period covered by this report.

Item 16. Controls and Procedures.

- (a) The registrant's President (principal executive officer) and Treasurer (principal financial officer) determined that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940 (the "Act")) are effective, based on their evaluation of these controls and procedures required by Rule 30a-3(b) under the Act and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934 within 90 days of the date of this report. There were no significant changes in the registrant's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation. The officers identified no significant deficiencies or material weaknesses.
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Act) that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 17. Disclosure of Securities Lending Activities for Closed-End Management Investment Companies.

Not applicable.

Item 18. Recovery of Erroneously Awarded Compensation.

The registrant did not require an accounting restatement that required recovery of erroneously awarded compensation pursuant to the registrant's compensation recovery policy required by the listing standards adopted pursuant to 17 CFR 240.10D-1.

Item 19. Exhibits.

- (a) (1) Code of ethics See Item 2.
 - (2) Not applicable.
 - (3) Certifications of principal executive and principal financial officers as required by Rule 30a-2(a) under the Act. Filed herewith.
 - (4) Not applicable.
 - (5) There was no change in the registrant's independent public accountant for the period covered by this report.
- (b) Certification of principal executive and principal financial officers as required by Rule 30a-2(b) under the Act. Filed herewith.
